Figure 15: Report generated for reported and Not reported facilities

8. Week wise SPL - Forms Submission Status for Selected Period (National/State/District) : Status of submission for weekly surveillance information will invoke the below reports:

- a) Weekly Data Received: For accessing number of districts/blocks/RUs reporting
- b) Weekly Reporting percentage: For accessing %age of districts/blocks/RUs reporting
- c) Weekly Summary Report: This is very useful for monitoring purpose regarding the total number of RUs in a particular State/District and the RUs reported. It is similar to Covering Sheet of RUs in State/District/Block
 - Select the Reporting Level (State/District/Block)
 - In case of Weekly Summary Report -> select the Form Type for two reports (a & b) above -> select the State/District, year and weeks. (Please refer to the Figure 9 below)

Figure 16: Selection of parameters for summary sheet

9. Consistency Report (Please refer to 8.0 section for details)
10. IDSP User's Login Status Report: This is for users monitoring purpose, which users have ever logged in or used previously. From this report one can also view the date and time of login for a particular user.

C. Disease Outbreak Report:

11. Disease Outbreak Report: This report will generate outbreak reported for selected National/State level for the selected period.
12. Disease Outbreak Submission Status: This report will generate state wise no of outbreak reported for the selected period.
13. Search for Disease Outbreak: This report will generate disease syndrome wise outbreak reported for the selected period.
14. Disease Outbreak History: This report will generate disease wise outbreak report for the selected state and disease.

D. Quarterly FMR Report:

15. FMR Report Quarterly: This report will generate Quarterly FMR report for state/district wise for the selected financial year.
16. FMR Submission Status: This report will generate submission status of Quarterly FMR report for State/Districts.

E. Feedback Report:

17. This report will generate the feedback given by the various users for the selected period.

F. Reporting Unit Report:

18. This report is useful to detect the garbage master data; this shows all the garbage/non-visible master data which might have been created by mistake or for demonstration purposes but has not been deleted due to some or other reasons. This will show the exact number of Blocks/RUs in any particular district for further corrections.

8. CONSISTENCY REPORT

Timeliness & Consistency: - Timeliness may be defined as reports obtained within one week after the last date of every reporting week. Minimum expectation is that each reporting unit reports for at least 40 weeks (or 80% of week at any given time under consideration) in a year (52 weeks). All identified reporting units must report. However, for programme purpose, the following definition of consistency may be followed:

- A reporting unit is consistent, if it has reported for at least 40 weeks (or \geq 80% of week at any given time).
- A district is consistent for a week if at least 80% of RUs under the district report for a particular week.
- A state is consistent for a week if at least 80% of the district (having consistent RUs) report for a particular week.

Grouping for Consistency Report: - Reports should have desegregated collated forms of

- P {i. PHCs, ii Other Govt. Hospitals (CHC/ID Hospitals/Medical Colleges/Other Premier Institutes/Public Sector Hospitals) and iii Private hospitals separately}
- L (Government and Private Laboratory) and
- S reporting units (Subcentres)

How does a reporting unit/district become consistent

Suppose we have 5 reporting units i.e. A, B, C, D, E in a district and we want to check the consistency of this district during 10 weeks of the current year. The denominator in this case is 10 and any unit that has reported in time for 8 weeks or more will be considered as consistent.

Now, RU A has reported for 9 weeks, B for 8 weeks, C for 7 weeks, D for 8 weeks and E only 5 weeks as table below. (Reporting unit, reported is mentioned as "Y" and not reported mentioned as "N")

S. No	RUS	W1	W2	W3	W4	W5	W6	W7	W8	W9	W10	Count (Y)	% age of Y (Count Y/10) X 100
1	A	Y	Y	Y	N	Y	Y	Y	Y	Y	Y	9	90
2	B	Y	N	Y	N	Y	Y	Y	Y	Y	Y	8	80
3	C	Y	N	Y	N	N	Y	Y	Y	Y	Y	7	70
4	D	N	N	Y	Y	Y	Y	Y	Y	Y	Y	8	80
5	E	N	N	N	N	N	Y	Y	Y	Y	Y	5	50

Thus we can see that only 3 reporting units A, B, D of the district are reporting consistently. Reporting units C and E are not consistent because they are reporting for less than 80% of weeks.

In the above example the given district is not consistent because only 60% [3 out of 5] reporting units are reporting consistently.

Steps for viewing Consistency Report based on P form on Portal:-

Step 1:- For viewing the consistency report click 'CONSISTENCY REPORT'.

Step 2:- After clicking on consistency report a window will open as under and fill up the desired information as required.

Figure 17: Selecting parameters for Consistency report

- A. Select Reporting format (State/District/Block Level); Say for a State.
- B. Select States (Priority/Non Priority/Entire State)
- C. Select Form Type (S/P/L form)
- D. Select year (2008/2009/2010).
- E. Enter week no. in from and to check box as required.

After completing steps A to E the following window will appear.

S.No	State	Total No of RU's	Total No. of Districts	Week : 13 TO 34 Weeks 22 and Year 2010
