District wise disease alerts-outbreaks reported in the 9th week 2026

9th Week Map

Unique ID.	Name of State-UT	Name of District	Disease- Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments- Action Taken
AP/ANA/2026/9/303	Andhra Pradesh	Anakapalli	Chickenpox	14	0	24-02-2026	28-02-2026	Under Control	Cases of fever with rash were reported from Village Vooderu, Sub-District Anakapalli, District Anakapalli. District RRT investigated the outbreak. House to house search for fever cases was done. Cases were in the age group 6-13 years. All 13 serum samples collected, tested negative for Measles and Rubella (IgM ELISA). Cases were clinically diagnosed with chickenpox. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
AP/ANA/2026/9/304	Andhra Pradesh	Ananthapuramu	Acute Diarrhoeal Disease	17	0	23-02-2026	23-02-2026	Under Surveillance	Cases of loose motion were reported from Village E.Sodanapalli, Sub-District Singanamala, District Ananthapuramu. District RRT investigated the outbreak. The affected age group was 12-75 years. Cases were treated at CHC Singanamala. Medical camp was conducted. Chlorination of water source was done and sanitation activities were conducted. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

AP/CHI/2026/9/305	Andhra Pradesh	Chittoor	Fever with Rash	13	0	27-02-2026	27-02-2026	Under Surveillance	Cases of fever with rash were reported from Village/PHC Veernamala, Sub-District Ramakuppam, District Chittoor. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were students of different schools in the affected area. All cases were treated. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
AP/SRI/2026/9/306	Andhra Pradesh	Srikakulam	Acute Diarrhoeal Disease	172	0	23-02-2026	23-02-2026	Under Surveillance	Cases of loose motion were reported from Urban area Pathan, Sub-District Srikakulam, District Srikakulam. District RRT investigated the outbreak. House to house survey was done. Cases were treated at health facilities. Both children and adults were affected. Medicine and ORS packets were given to cases. Chlorination of water sources was done in the locality. Pipeline leakages were inspected and repaired. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AP/VIS/2026/9/307	Andhra Pradesh	Visakhapatnam	Acute Gastroenteritis	25	0	26-02-2026	27-02-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Gamberam Boyapalem, Sub-District Anandapuram, District Visakhapatnam. The incident occurred at Hare Rama Hare Krishna foundation, Akshyapatra Ashram. The cases had consumed breakfast in the Ashramamam (dosa, coconut and

									peanut chutney, sambar and buttermilk). Medical Camp was conducted in the Ashramamam. The cases were treated at NRI Private Hospital Thagarapuvalasa, Bheemunipatnam Mandal, Visakhapatnam. All cases recovered. The affected age group was 26-40 years. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AS/GOL/2026/9/308	Assam	Golaghat	Acute Diarrhoeal Disease	19	0	25-02-2026	25-02-2026	Under Surveillance	Cases of loose motion were reported from Village Riri, Sub-District Bokakhat, District Golaghat. District RRT and Block Health Team investigated the outbreak. 2 water samples and 2 rectal swab samples were tested at the DPHL (IDSP), SKK Civil Hospital, Golaghat. Water samples were negative by H ₂ S and MPN tests. Rectal swab culture showed normal flora. Cases were treated at Bokakhat Sub Divisional Civil Hospital. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
BH/KIS/2026/9/309	Bihar	Kishanganj	Measles	8	0	25-02-2026	27-02-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Barab Kahunia, Sub-District Pothia, District Kishanganj. District RRT investigated the outbreak. Active

									search for fever cases was done in the affected area. Cases were treated symptomatically. The affected age group was 2-20 years. Cases were clinically diagnosed with Measles. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
CT/BAS/2026/9/310	Chhattisgarh	Bastar	Acute Diarrhoeal Disease	37	0	20-02-2026	24-02-2026	Under Control	Cases of vomiting and loose motion were reported from Village Nalpawand, Sub-District Bakawand, District Bastar. District RRT investigated the outbreak. Medical camp and house-to-house survey were conducted. The affected age group was 2-61 years. 1 stool sample was sent to Medical College Dimrapal, Jagdalpur for culture testing, and was found to be negative. 1 water sample was sent to Medical College Dimrapal, Jagdalpur Lab, and no positive findings were reported. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
CT/DUR/2026/9/311	Chhattisgarh	Durg	Chickenpox	6	0	26-02-2026	27-02-2026	Under Surveillance	Cases of fever with rash were reported from Village Ganiyari, Sub-District Patan, District Durg. District RRT investigated the outbreak. A door-to-door survey was conducted in the affected area. The affected age group was 3-27 years. 2 blood samples were tested at NIRTH Jagdalpur Lab for Measles and Rubella by IgM ELISA. No positive findings were reported. Community awareness and health education given

									by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
CT/GAR/2026/9/312	Chhattisgarh	Gariyaband	Acute Diarrhoeal Disease	53	0	22-02-2026	23-02-2026	Under Surveillance	Cases of loose motion and vomiting were reported from Villages Boirgaonkalan and Mohlai, Sub-District Bindranavagarh (Gariyaband), District Gariyaband. District and Block RRT investigated the outbreak. The affected age group was 4-72 years. 3 stool samples were sent to Raipur Medical College for culture and 2 water samples were sent to PHE Gariaband Lab for testing. No positive findings were reported. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation
GJ/MOR/2026/9/313	Gujarat	Morbi	Measles	5	0	28-02-2026	28-02-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Ghunada Sajanpar, Sub-District Morvi, District Morbi. District RRT investigated the outbreak. The affected age group was 7-12 years. Out of 5 serum and throat swab samples collected and sent to BJMC for testing by IgM ELISA, 4 serum samples were found to be positive for Measles. The children of the affected area were vaccinated with MR vaccine and Vitamin A solution was given to cases. Community awareness and health education given by the

									peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
HR/AMB/2026/9/314	Haryana	Ambala	Hepatitis A & E	37	0	23-02-2026	24-02-2026	Under Surveillance	Cases of jaundice, loss of appetite, abdominal pain and vomiting were reported from Village Ugala, Sub-District Barara, District Ambala. District RRT investigated the outbreak. House-to-house survey was conducted in the affected area. The affected age group was 10-18 years. Medical camps were organized and arrangements were made for drinking water supply in the affected area by the public health department. 66 water samples were sent for bacteriological analysis and 123 blood samples were sent for Hepatitis A and E testing to District Molecular Lab, Ambala. 5 water samples were found positive for coliform. 34 Blood Samples were found positive for Hepatitis A and 3 blood samples were found positive for Hepatitis E (IgM ELISA). Range of liver enzymes like SGOT and SGPT were elevated in the positive blood samples. Chlorination was conducted. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
HR/KUR/2026/9/315	Haryana	Kurukshetra	Acute Diarrhoeal Disease	26	0	25-02-2026	25-02-2026	Under Control	Cases of loose stools, abdominal pain, fever with mild dehydration were reported from Urban Thanesar, Gabind Garh Colony, Sub-District Thanesar, District Kurukshetra. District RRT investigated the

									<p>outbreak. The affected age group was 1-72 years. Door-to-door case identification was done. Out of 7 water samples collected, 4 samples were non-potable. 7 blood samples were tested for HAV, HEV, Widal, and 4 stool samples were tested for cholera at the Department of Microbiology, KCGMC, Karnal. No positive findings were reported. Halogen, zinc, ORS and other medicines were distributed. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.</p>
JK/BAR/2026/9/316	Jammu and Kashmir	Baramulla	Hepatitis A	13	0	28-02-2026	28-02-2026	Under Surveillance	<p>Cases of yellow discoloration of eyes, abdominal pain and fatigue were reported from Village Khadaniar, Sub-District Baramulla, District Baramulla. District and Block RRT investigated the outbreak. The affected age group was 5-21 years. Blood samples from 9 cases were sent to DPHL, IDSP Baramulla, for testing of Hepatitis A and E. 3 blood samples came positive for Hepatitis A (IgM ELISA). 3 water samples were collected from different water sources in the village and sent to DPHL, IDSP Baramulla for microbiological analysis. 1 sample was unsatisfactory. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation</p>

JH/EAS/2026/9/317	Jharkhand	East Singhbhum	Chickenpox	6	0	21-02-2026	24-02-2026	Under Surveillance	Cases of papulo-vesiculo-pustular eruption and fever were reported from Village Shirishbani, Sub-District Ghatshila, District East Singhbhum. District RRT investigated the outbreak. The affected age group was 2-35 years. 2 blood samples were tested at MGM VRDL lab Jamshedpur. Both samples were found to be positive for <i>Varicella zoster</i> by IgM ELISA. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
KN/BID/2026/9/318	Karnataka	Bidar	Acute Diarrhoeal Disease	11	0	23-02-2026	24-02-2026	Under Control	Cases of loose motion were reported from Village Nimboora, Sub-District Homnabad, District Bidar. District RRT investigated the outbreak. The affected age group was 11-78 years. 4 stool samples (for culture) and 2 water samples were tested at DPHL Bidar. All stool samples tested negative for pathogens and both water samples were not potable (NSPP). The cause of the outbreak was consumption of water from contaminated bore well. A temporary medical camp was established in the village to provide treatment. ORS packets were distributed. Repairs to damaged and leaking pipelines were initiated Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

KN/MYS/2026/9/319	Karnataka	Mysuru	Chickenpox	51	0	26-02-2026	26-02-2026	Under Surveillance	Cases of fever followed by vesicular rash were reported from Government Higher Primary School, Village Chilkunda, Sub-District Hunsur, District Mysuru. District RRT investigated the outbreak. Most of the cases were in the age group of 5-14 years. 5 serum samples were tested at Mysore Medical College and Research Institute. All samples were positive for Chickenpox by IgM ELISA. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
KL/ERN/2026/9/320	Kerala	Ernakulam	Measles	5	0	02-02-2026	27-02-2026	Under Surveillance	Cases of fever with rash were reported from Village Vadavucode, Sub-District Kunnathunad, District Ernakulam. District RRT investigated the outbreak. The affected age group was 5-46 years. 5 serum samples were tested by PCR at the State Public Health Laboratory, Thiruvananthapuram. 4 serum samples were found positive for Measles. 3 cases were vaccinated for MR. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
KL/ERN/2026/9/321	Kerala	Ernakulam	Acute Gastroenteritis	55	0	26-02-2026	27-02-2026	Under Surveillance	Cases of loose motion, abdominal pain, fever, bloating and nausea were reported from Village Vadavucode, Sub-District Kunnathunad, District Ernakulam. The cases were from the hostel of Sree Sudheendra Nursing School. District RRT investigated the

									outbreak. The affected age group was 16 to 30 years. 2 water samples were tested at the RPH lab. <i>E. coli</i> was found in both on bacteriological analysis. After super chlorination, 5 samples were collected and tested at RPH Lab Ernakulam and all samples were found to be sterile. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/ERN/2026/9/322	Kerala	Ernakulam	Chickenpox	9	0	23-02-2026	27-02-2026	Under Surveillance	Cases of fever, myalgia and rash were reported from Village Thrikkakara North (Part), Sub-District Kanayannur, District Ernakulam. District RRT investigated the outbreak. The cases were 9-year-old students from the 3rd standard in Rajagiri Higher Secondary School, Kalamassery. The cases were clinically diagnosed and symptomatically treated. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
KL/KAN/2026/9/323	Kerala	Kannur	Hepatitis A	15	0	27-02-2026	27-02-2026	Under Surveillance	Cases were reported from Ward 2, Koyatile area, Village Kannavam, Sub-District Kannavam, District Kannur. District RRT investigated the outbreak. The affected age group was 7-57 years. 4 blood samples tested positive for Hepatitis A (IgM ELISA) at RPH Lab, Kannur; Indira Gandhi Laboratory, Thalassery; and Aster MIMS, Kannur. 5 water samples were collected and sent to the Regional Analytical Laboratory,

									Kuthuparamba, of which 1 sample tested positive for <i>E. coli</i> . Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/KAN/2026/9/324	Kerala	Kannur	Acute Diarrhoeal Disease	34	0	23-02-2026	24-02-2026	Under Surveillance	Cases of abdominal pain, vomiting, loose stools and fever were reported from Village Kadannappalli (CT), Sub-District Payyannur, District Kannur. District RRT investigated the outbreak. The affected age group was 17–21 years. Cases were from the Government Nursing College Girls Hostel, Pariyaram who had consumed dinner (chicken biriyani, veg biriyani, curd salad and pickle). Students were treated at Pariyaram Medical College Hospital. Used oil residue was found on kitchen inspection. 2 water samples were tested at Microbiology Lab MCH Kannur, Pariyaram. No positive findings of <i>E. coli</i> and coliforms were reported. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/KOZ/2026/9/325	Kerala	Kozhikode	Hepatitis A	14	0	25-02-2026	25-02-2026	Under Surveillance	Cases of fever, vomiting and fatigue were reported from Village Kodyathur, Sub-District Kozhikode, District Kozhikode. District RRT investigated the outbreak. House to house survey was done. Cases were students of GMUP School

									<p>Kodiyathoor. All cases were treated at FHC Kodiyathur and CHC Cheruvady. Cases were in the age group of 12-20 years. The school well water sample was sent to Regional Analytic Laboratory Malappuram for quality testing, and it resulted positive for coliform and <i>E.coli</i>. 3 serum samples were tested at RPHL, Malaparamba (2) and Santhi Hospital Kozhikode (1) for HAV by IgM ELISA and were found to be positive. All cases recovered. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe food habits and drinking water, hygiene and sanitation.</p>
KL/PAT/2026/9/326	Kerala	Pathanamthitta	Hepatitis A	15	0	25-02-2026	25-02-2026	Under Surveillance	<p>Cases of abdominal pain, nausea, yellow colored urine and fever were reported from Village Pandalam Thekkekara, Sub-District Adoor, District Pathanamthitta. All cases were staff working at CM Hospital, Pandalamhospital. Cases were treated. District RRT visited the hospital. Inspection of the hospital premises was carried out. The affected age group was 20-50 years. 15 serum samples were tested at CM Pandalam and RPHL Kozhenchery by IgM ELISA and Hepatitis A rapid card test. All samples were found to be positive. 5 water samples sent to IAV Thonnaykkal were unsatisfactory. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe food</p>

									habits and drinking water, hygiene and sanitation.
KL/THI/2026/9/327	Kerala	Thiruvananthapuram	Suspected Food Poisoning	78	0	25-02-2026	25-02-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain, fever and fatigue were reported from Village Pettah, Sub-District Thiruvananthapuram, District Thiruvananthapuram. District RRT investigated the outbreak. Cases fell ill after eating food at a religious gathering. Cases were treated at UPHC Palkulangara. All cases recovered. Cases were in the age group 45-59 years. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
KL/THR/2026/9/328	Kerala	Thrissur	Mumps	7	0	23-02-2026	01-03-2026	Under Surveillance	Cases of fever with parotid gland swelling were reported from Village Kandanassery (CT), Sub-District Kunnankulam, District Thrissur. District RRT investigated the outbreak. Active search for fever cases was done. Cases were students of Second Standard Division A of Excelsior LP School, Kandanassery (Ward 15). Out of 28 students in the class, 7 students were affected. Cases were treated at FHC Kandanassery. Cases were clinically diagnosed with Mumps. All cases had received MR vaccination only and were home isolated after seeking medical care. Health staff visited the school, informed ward members and PTA, shared IEC messages through parents' WhatsApp groups, and an institutional meeting was held. Cases were advised home isolation, and health education and IEC messages

									were provided to school authorities and parents.
KL/WAY/2026/9/329	Kerala	Wayanad	Chickenpox	24	0	28-02-2026	01-03-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Pozhuthana, Sub-District Vythiri, District Wayanad. District RRT investigated the outbreak. District RRT investigated the outbreak. All cases were treated symptomatically. Cases were in the age group 13-15 years. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MP/CHH/2026/9/330	Madhya Pradesh	Chhindwara	Chickenpox	32	0	25-02-2026	25-02-2026	Under Surveillance	Cases of fever with fluid filled vesicles and itching on the body were reported from Village Pataniya, Sub-District Mohkhed, District Chhindwara. District and Block RRT investigated the outbreak. The affected age group was 3-42 years. House-to-house survey was conducted. Cases were clinically diagnosed with chickenpox. Symptomatic treatment was given to cases. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
MP/NEE/2026/9/331	Madhya Pradesh	Neemuch	Measles	5	0	24-02-2026	26-02-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Dayli, Sub-District Rampura, District Neemuch. District RRT investigated the outbreak. The affected age group was 1-14 years. 5 Blood serum samples collected and sent to GMC

									Bhopal, tested positive for Measles (IgM ELISA). House-to-house and school surveys were conducted. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
MP/RAT/2026/9/332	Madhya Pradesh	Ratlam	Measles	13	0	24-02-2026	24-02-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Rupapada, Sub-District Bajna, District Ratlam. District RRT investigated the outbreak. The affected age group was 10 months-9 years. 5 serum samples collected and sent to GMC Bhopal, tested positive for Measles (IgM ELISA). House-to-house surveys were conducted. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, vaccination, hygiene and sanitation.
MP/SHI/2026/9/333	Madhya Pradesh	Shivpuri	Measles	6	0	30-01-2026	24-02-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Ward No.1, Krishna Nagar Colony, Sub-District and District Shivpuri. The affected age group was 1-7 years. 6 blood samples were tested at GMC Bhopal. 3 samples tested positive for Measles virus by IgM ELISA. House-to-house survey was conducted. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.

OR/ANU/2026/9/334	Odisha	Anugul	Acute Diarrhoeal Disease	59	0	28-02-2026	28-02-2026	Under Surveillance	Cases of loose motion with abdominal pain were reported from Village Tubey, Sub-District Banarpal, District Anugul. District and Block RRTs investigated the outbreak. Most cases were in the age group of 15-44 years. 18 rectal swab samples and 6 water samples were collected and sent to DPHL, Angul for culture and H ₂ S/OT testing, respectively. Rectal swab culture yielded <i>Escherichia coli</i> with counts >50/100 ml. 3 water samples tested positive by H ₂ S test, and OT levels were <0.01 ppm. The water source was identified as the suspected source of infection. Control measures included contact dose administration. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
OR/JHA/2026/9/335	Odisha	Jharsuguda	Acute Diarrhoeal Disease	22	0	27-02-2026	28-02-2026	Under Control	Cases of loose motion with abdominal pain were reported from Village Panchgaon, Sub-District Lakhanpur, District Jharsuguda. District RRT investigated the outbreak. The affected age group was 5-14 years. Cases were hostel students of Panchasakha UP School who had consumed leftover chicken. The cases were treated at CHC Lakhanpur. 3 water samples and 5 stool samples were collected and sent to DPHL Jharsuguda for H ₂ S/OT and culture testing, respectively. All water samples were negative for fecal contamination by H ₂ S test, with OT levels of 0.0 ppm. Rectal swab culture

									showed no growth in one sample, while two samples yielded growth of <i>Enterococcus</i> spp. after 48 hours. Based on epidemiological and laboratory findings, a food-borne source of infection among hostel students is suspected. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
OR/KAN/2026/9/336	Odisha	Kandhamal	Suspected Food Poisoning	43	0	24-02-2026	25-02-2026	Under Control	Cases were reported from Village Sirla, Sub-District Tumudibandha, District Kandhamal. District and Block RRTs investigated the outbreak. Most cases were in the age group of 15-44 years. A health camp was organized. Cases were students of Sirla High School who had consumed food at the hostel canteen. 3 rectal swab samples and 2 water samples were collected and sent to DPHL, Kandhamal for culture and H ₂ S/OT testing, respectively. No positive findings were reported. Water disinfection was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
OR/NUA/2026/9/337	Odisha	Nuapada	Suspected Food Poisoning	22	0	24-02-2026	24-02-2026	Under Control	Cases of loose motion with vomiting were reported from Village Kalyanpur, Sub-District Jonk, District Nuapada. District and Block RRTs investigated the outbreak. Most cases were in the age group of 15-44 years. A health camp was organized. Cases had consumed <i>prasad</i> at a marriage function. 1 rectal swab

									sample and 1 water sample were collected and sent to DPHL, Nuapada for culture and H ₂ S/OT testing, respectively. No positive findings were reported. Cases were treated at CHC Khariar and DHH Nuapda. Water disinfection was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
PB/FIR/2026/9/338	Punjab	Ferozepur	Leptospirosis	37	1	26-02-2026	27-02-2026	Under Surveillance	Cases of jaundice, pain in abdomen, fever and vomiting were reported from Village Hazara Singh Wala, Sub-District Mamdot, District Ferozepur. District RRT investigated the outbreak. The affected age group was 6 months to 65 years. Cases were treated at a medical camp established in the affected area. 77 blood samples were collected for leptospirosis and were tested at DPHL Lab Ferozpur. 37 samples were positive for leptospirosis by ELISA test. 46 water samples were sent to SPHL lab Kharar out of which 32 water samples were non-potable. A 12-year-old female, suspected of leptospirosis, died on 21.02.26 and had symptoms of fever, jaundice and dark yellow coloured urine. House-to-house surveys were done, medical camps were arranged, ORS packets and chlorine pellets were distributed. Community awareness and health education was given by the peripheral team on hygiene and sanitation.

PB/SHA/2026/9/339	Punjab	Shahid Bhagat Singh Nagar	Acute Diarrhoeal Disease	11	0	24-02-2026	24-02-2026	Under Control	Cases of loose motion, vomiting and abdominal pain were reported from Village Kathgarh (203), Sub-District Balachaur, District Shahid Bhagat Singh Nagar. District RRT investigated the outbreak. The affected age group was 22-78 years. 25 water samples were tested at State Public Health Lab, Kharar, of which 11 were found non-potable. 3 blood samples were negative for Hepatitis A and E at District Public Health Lab, SBS Nagar, and 2 stool samples tested negative for cholera, with isolates of E. coli and Klebsiella consistent with normal flora at District Public Health Lab, SBS Nagar. Water pipelines were inspected and repaired. Chlorine tablets and ORS were distributed in the affected area. All pipelines checked, no leakage found. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
TN/KAL/2026/9/340	Tamil Nadu	Kallakurichi	Chickenpox	13	0	27-02-2026	27-02-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Urangani, Sub-District Sankarapuram, District Kallakurichi. District RRT investigated the outbreak. All cases were treated symptomatically. Cases were below 15 years of age. 2 serum samples were tested at King Institute, Chennai, and both were negative for <i>V. zoster</i> by IgM ELISA. Cases were clinically diagnosed with chickenpox. Community awareness and health education was given by the peripheral

									team on isolation of cases, hygiene maintenance and proper nutrition.
TN/KAL/2026/9/341	Tamil Nadu	Kallakurichi	Chickenpox	15	0	24-02-2026	24-02-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Keelapattu, Sub-District Sankarapuram, District Kallakurichi. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Both children and adults were affected. 3 serum samples were tested at King Institute, Chennai, and all were negative for <i>V. zoster</i> by IgM ELISA. Cases were clinically diagnosed with chickenpox. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
TN/KAL/2026/9/342	Tamil Nadu	Kallakurichi	Chickenpox	26	0	23-02-2026	24-02-2026	Under Surveillance	Cases of fever with rashes were reported from Village Seshasamudhiram, Sub-District Sankarapuram, District Kallakurichi. Cases were students of Government Higher Secondary School Seshasamudhiram. District RRT investigated the outbreak. All cases were treated symptomatically. Cases were below 18 years of age. 5 serum samples were tested at King Institute, Chennai, and all were negative for <i>V. zoster</i> by IgM ELISA. Cases were clinically diagnosed with chickenpox. School authorities were advised to isolate symptomatic cases for 7 days. Community awareness and health education was given by the peripheral

									team on isolation of cases, hygiene maintenance and proper nutrition.
