13<sup>th</sup> Week Map

Disease alerts/outbreaks reported during this week (N=43)

Disease wise no of outbreaks reported under IDSP during 2022-2026 till 13th wk of Every Year

Unique ID.	Name of State-UT	Name of District	Disease- Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments- Action Taken
AP/CHI/2026/13/487	Andhra Pradesh	Chittoor	Dysentery	16	0	28-03-2026	28-03-2026	Under Surveillance	Cases of loose motion with mucus were reported from Village Pathurnatham, Sub-District Baireddypalli, District Chittoor. District RRT investigated the outbreak. House to house survey was done. The cases had gathered for a religious congregation. The affected age group was 15-60 years. 5 Water samples were tested by the RWS Department. All the samples were satisfactory and safe for drinking. A medical camp was arranged. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AP/NAN/2026/13/488	Andhra Pradesh	Nandyal	Acute Diarrhoeal Disease	10	0	23-03-2026	25-03-2026	Under Surveillance	Cases of vomiting and loose motion were reported from Village Budagajag Gala Colony, Sub-District Nandyal Rural, District Nandyal. District RRT investigated the outbreak. The affected age group was 5-44 years. The cases had consumed leftover food items distributed from a social occasion. 3 water samples were tested at Regional Lab Kurnool and no positive findings were reported. 3 stool samples were tested at GGH Nandyal. 2 samples tested positive for <i>E. Coli</i> . House-to-house survey, medical camp and distribution of medicines, chlorine tablets, ORS Packets and zinc tablets were conducted. Community awareness and health education given by the peripheral team on

									safe drinking water and food habits, hygiene and sanitation.
<b>AP/NTR/2026/13/489</b>	<b>Andhra Pradesh</b>	<b>Ntr</b>	<b>Acute Gastroenteritis</b>	19	0	28-03-2026	28-03-2026	<b>Under Surveillance</b>	Cases of loose motion, vomiting, fever and abdominal pain were reported from Village Chandapuram, Sub-District Nandigama, District NTR. District RRT investigated the outbreak. The affected age group was 5-44 years. The outbreak occurred most likely due to consumption of leftover food from a religious event. A medical camp was established in the affected area at the health and wellness centre. 4 stool samples tested at SMC Microbiology were negative for Vibrio cholerae. 2 blood cultures were negative for bacterial growth. 2 water samples were satisfactory. House to house surveillance was initiated. Both children and adults were affected. Panchayat water sources were cleaned and chlorinated. ORS packets were distributed. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>AP/VIZ/2026/13/490</b>	<b>Andhra Pradesh</b>	<b>Vizianagaram</b>	<b>Acute Diarrhoeal Disease</b>	10	0	25-03-2026	28-03-2026	<b>Under Surveillance</b>	Cases of loose motion were reported from Village Pogiri, Sub-District Rajam, District Vizianagaram. District RRT investigated the outbreak. The affected age group was 3-60 years. A medical camp was arranged. 6 water samples were collected by RWS from Pogiri village, and the test results were satisfactory. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>AS/GOA/2026/13/491</b>	<b>Assam</b>	<b>Goalpara</b>	<b>Chickenpox</b>	16	0	20-03-2026	24-03-2026	<b>Under Surveillance</b>	Cases of fever with vesicular rash were reported from Village Gobindapur (CT), Sub-District Balijana, District Goalpara. District RRT investigated the outbreak.

									Active search for fever cases was done. Cases were treated symptomatically. The affected age group was 11 months-26 years. 5 blood samples were sent for Chickenpox (IgM ELISA) test at GMCH, Guwahati, 3 were positive for Varicella zoster virus. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
<b>AS/KAR/2026/13/492</b>	<b>Assam</b>	<b>Karbi Anglong</b>	<b>Suspected Food Poisoning</b>	235	0	23-03-2026	25-03-2026	<b>Under Control</b>	Cases of vomiting, loose motion, abdominal pain, headache and occasional fever were reported from Adarsha Timung Gaon, Bokolia, District Karbi Anglong. District RRT investigated the outbreak. Cases developed symptoms after eating food at a marriage ceremony on 22.03.2026. Both children and adults were affected. Cases were treated at Diphu Medical College, Bokolia CHC, Phuloni Model Hospital, and Dokmoka PHC. All cases recovered. 6 stool samples and water samples (tube well and packaged drinking water) were collected and tested at the Department of Microbiology, DMCH, Diphu. 1 stool sample yielded Salmonella enterica spp. after 24 hours of aerobic incubation at 37°C. Tube well water was found unsatisfactory, while packaged drinking water was within acceptable limits. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
<b>AS/SIV/2026/13/493</b>	<b>Assam</b>	<b>Sivasagar</b>	<b>Acute Diarrhoeal Disease</b>	21	0	25-03-2026	26-03-2026	<b>Under Surveillance</b>	Cases of vomiting and loose watery stools were reported from Village Rajmai Grant, Sub-District Dimow, District Sivasagar. District RRT investigated the outbreak. House-to-house survey was done. Cases were treated at Rajmai TE hospital. All

									cases recovered. ORS packets were given to cases. Cases were in the age group of 1-50 years. 1 rectal swab was tested at DPHL Sivasagar. No bacterial growth was seen in the culture. Water sample showed coliform counts of 4–10 per 100 ml, which is not potable. Chlorination of water sources was done in the affected area. Community awareness and health education was given by the peripheral team on safe drinking , hygiene and sanitation.
<b>BH/JEH/2026/13/494</b>	<b>Bihar</b>	<b>Jehanabad</b>	<b>Chickenpox</b>	10	0	23-03-2026	25-03-2026	<b>Under Surveillance</b>	Cases of maculopapular vesicular rash over the face, trunk, and limbs, associated with mild fever, headache (forehead pain), and burning sensation were reported from Village Ramzani, Sub-District Kako, District Jehanabad. District RRT investigated the outbreak. The affected age group was 3-8 years. 5 blood samples were sent to Nalanda Medical College, Patna for laboratory testing. All samples tested positive for Chickenpox (Varicella) IgM ELISA. Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.
<b>BH/MAD/2026/13/495</b>	<b>Bihar</b>	<b>Madhubani</b>	<b>Fever with Rash</b>	5	0	25-03-2026	25-03-2026	<b>Under Surveillance</b>	Cases of fever with rash were reported from Village Bahera, Sub-District Madhepur, District Madhubani. District RRT investigated the outbreak. Active search for fever cases was done. Symptomatic treatment was given to cases. The affected age group was 8-21 years. Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.

<b>BH/MAD/2026/13/496</b>	<b>Bihar</b>	<b>Madhubani</b>	<b>Fever with Rash</b>	15	0	25-03-2026	25-03-2026	<b>Under Surveillance</b>	Cases of fever with rash were reported from Village Birpur, Sub-District Madhepur, District Madhubani. District RRT investigated the outbreak. Active search for fever cases was done. Medicines were given to cases. The affected age group was 3-21 years. Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.
<b>BH/MAD/2026/13/497</b>	<b>Bihar</b>	<b>Madhubani</b>	<b>Fever with Rash</b>	5	0	19-02-2026	25-03-2026	<b>Under Surveillance</b>	Cases of fever with rash were reported from Village Nurchak, Sub-District Bisfi, District Madhubani. District RRT investigated the outbreak. House to house fever survey was done. Cases were given symptomatic treatment. The affected age group was 2-9 years. Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.
<b>BH/MAD/2026/13/498</b>	<b>Bihar</b>	<b>Madhubani</b>	<b>Fever with Rash</b>	10	0	20-02-2026	25-03-2026	<b>Under Surveillance</b>	Cases of fever with rash were reported from Village Narar, Sub-District Kaluahi, District Madhubani. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were treated. The affected age group was 4-45 years. Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.
<b>BH/MAD/2026/13/499</b>	<b>Bihar</b>	<b>Madhubani</b>	<b>Fever with Rash</b>	5	0	24-02-2026	25-03-2026	<b>Under Surveillance</b>	Cases of fever with rash were reported from Village Karmouli, Sub-District Kaluahi, District Madhubani. District RRT investigated the outbreak. Active search for fever cases was done. The affected age group was 14-29 years. Cases were treated

									symptomatically. Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.
<b>GJ/AHM/2026/13/500</b>	<b>Gujarat</b>	<b>Ahmadabad</b>	<b>Crimean-Congo Haemorrhagic Fever</b>	1	1	27-03-2026	27-03-2026	<b>Under Surveillance</b>	A 33-year-old male with symptoms of fever, severe headache, muscle aches, and vomiting was reported from Village Bilasiya, Sub-district Daskroi, District Ahmadabad. The serum sample of the case was positive for Nairovirus on conducting RT-PCR. The patient was admitted and expired in Apollo Hospital Bhat on 25.03.2026. The Health Department and the Animal Husbandry Department, initiated public health measures including active surveillance, contact tracing, entomological surveillance and vector control measures. IEC activities were conducted, and no additional cases have been reported.
<b>HP/KAN/2026/13/501</b>	<b>Himachal Pradesh</b>	<b>Kangra</b>	<b>Hepatitis A</b>	10	0	24-03-2026	25-03-2026	<b>Under Surveillance</b>	Cases of nausea, abdominal pain, fever and yellow coloured urine were reported from Village Sham Nagar (OG), Sub-District Dharamshala, District Kangra. District RRT investigated the outbreak. The affected age group was 9-12 years. 2 water samples were collected from the affected area and tested at Himachal Pradesh Jal Shakti Vibhag Public Health Laboratory, Dharamshala. No positive findings were reported. 10 blood samples were tested for Hepatitis A and E at Zonal Hospital, Dharamshala. All samples tested positive for Hepatitis A (IgM ELISA). Community awareness and health education given by the peripheral

									team on safe drinking water and food habits, hygiene and sanitation.
<b>JK/PUL/2026/13/502</b>	<b>Jammu and Kashmir</b>	<b>Pulwama</b>	<b>Hepatitis A</b>	7	0	24-03-2026	25-03-2026	<b>Under Surveillance</b>	Cases of abdominal pain, fatigue and yellow discoloration of eyes were reported from Village Zardihard, Block Tral, District Pulwama. District RRT investigated the outbreak. The affected age group was 14-39 years. 7 blood samples were collected and sent to DPHL Pulwama for hepatitis serology, 1 sample found positive for Hepatitis A. 4 water samples were collected and sent to DPHL Pulwama for MPN count, all 4 found unsatisfactory. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>JH/DUM/2026/13/503</b>	<b>Jharkhand</b>	<b>Dumka</b>	<b>Chickenpox</b>	9	0	22-03-2026	23-03-2026	<b>Under Surveillance</b>	Cases of fever with vesicular rash were reported from Dumka Sadar (ward no. 21), , Sub-District Dumka, District Dumka. District RRT investigated the outbreak. The affected age group was 19 to 40 years. 6 blood samples were collected for confirmation of chickenpox and measles. The samples were sent to DPHL Dumka. 2 samples tested positive for <i>V. zoster</i> by IgM ELISA. Active case was conducted and Vitamin A solution was given to all the cases. Community awareness and health education given by the peripheral team on isolation of cases, spread of infection, hygiene and sanitation.
<b>KN/BEN/2026/13/504</b>	<b>Karnataka</b>	<b>Bengaluru Rural</b>	<b>Acute Gastroenteritis</b>	49	0	29-03-2026	29-03-2026	<b>Under Surveillance</b>	Cases of loose motions and abdominal pain were reported from Village Bettenahalli, Sub-District Devanahalli, District Bengaluru Rural. District RRT investigated the outbreak. Cases had consumed food at a temple. Most cases were in the age group of 15-59 years. 3 water samples were tested at

									Ardeshanahalli PHC & PHI lab, 5 stool samples and 2 blood samples were tested at BMCRI. 2 water samples were found to be not safe for potable purposes, all stool samples were negative for enteropathogens and 2 blood samples tested negative for typhoid. A temporary clinic was established in the village. House to house surveillance was conducted and ORS packets were distributed. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>KN/BID/2026/13/505</b>	<b>Karnataka</b>	<b>Bidar</b>	<b>Acute Diarrhoeal Disease</b>	35	0	21-03-2026	23-03-2026	<b>Under Surveillance</b>	Cases of loose motions and abdominal pain were reported from Village Hankuni, Sub-District Homnabad, District Bidar. District RRT investigated the outbreak. Cases had consumed food at a birthday party. Most cases were in the age group of 5-44 years. 2 water samples and 6 stool samples were tested at DPHL, Bidar. 2 Water samples were found to be safe for potable purposes and all stool samples were negative for enteropathogens. All cases were treated at Taluka Hospital, Humnabad. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>KL/ALA/2026/13/506</b>	<b>Kerala</b>	<b>Alappuzha</b>	<b>Acute Diarrhoeal Disease</b>	48	0	21-03-2026	25-03-2026	<b>Under Surveillance</b>	Cases of loose motions and vomiting were reported from Village Aroor, Sub-District Cherthala, District Alappuzha. District RRT investigated the outbreak. Both children and adults were affected. The outbreak was suspected to be a food poisoning incident following a devotional feast. 2 water samples were tested at Public Health Laboratory Alappuzha and were

									found to be satisfactory. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>KL/KAN/2026/13/507</b>	<b>Kerala</b>	<b>Kannur</b>	<b>Hepatitis A</b>	44	0	25-03-2026	26-03-2026	<b>Under Surveillance</b>	Cases of fever, vomiting, headache, and body pain were reported from KPC Higher Secondary School, Village Pattannur, Sub-District Thalassery, District Kannur. The affected age group was 13 to 40 years. 10 serum samples were tested for HAV IgM ELISA, of which 5 were tested at RPH Kannur Laboratory; 3 at Dhanalakshmi Hospital, Kannur; 1 at Sreechand SPH; and 1 at AKG Hospital, Kannur; 5 tested positive. 11 water samples were tested at Kerala Water Authority Laboratory, Perunalathuparamba, of which five samples were positive for E. coli. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>KL/KOT/2026/13/508</b>	<b>Kerala</b>	<b>Kottayam</b>	<b>Suspected Food Poisoning</b>	60	0	23-03-2026	24-03-2026	<b>Under Surveillance</b>	Cases of fever, diarrhea, vomiting and abdominal pain were reported from Village Erumeli South, Sub-District Kanjirappally, District Kottayam. District RRT investigated the outbreak. Cases had consumed vegetable sandwiches and packed juice during a prayer program. ## DISEASE OUTBREAKS OF PREVIOUS WEEKS REPORTED LATE

Unique ID.	Name of State-UT	Name of District	Disease-Illness	No. of Cases	No. of Deaths	Date of Start Outbreak	Current Status	Comments- Action Taken
<b>AS/CAC/2026/13/524</b>	<b>Assam</b>	<b>Cachar</b>	<b>Japanese Encephalitis</b>	1	1	16-03-2026	<b>Under Surveillance</b>	A case aged 4.5 years old was reported from Village Chibitabichia Pt I, Sub-District Silchar, District Cachar. District RRT investigated the outbreak. House to house survey was done. The patient presented with symptoms of convulsions. CSF and serum sample was tested at SRL SMCH, of which serum sample tested positive for JE (IgM ELISA) on 24.03.26. The patient was vaccinated for JE. The patient died on 27.03.2026. Fogging was done in the affected area. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
<b>KL/MAL/2026/13/525</b>	<b>Kerala</b>	<b>Malappuram</b>	<b>Jaundice</b>	11	0	16-03-2026	<b>Under Surveillance</b>	Cases of fever, vomiting and jaundice were reported from Village Vettathur, Sub-District Perinthalmanna, District Malappuram. District RRT investigated the outbreak. The affected age group was 4-29 years. 4 water samples were collected from 4 wells and tested at the District Water Testing Centre Laboratory, Malappuram; results indicated that 2 wells were positive for E. coli. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

<b>KL/PAL/2026/13/526</b>	<b>Kerala</b>	<b>Palakkad</b>	<b>Meningitis</b>	1	0	28-02-2026	<b>Under Surveillance</b>	A case was reported from Village Pattithara, Sub-district Pattambi, District Palakkad. District RRT investigated the case. A 42-year-old female, consulted at Astra Healthcare, Padinjarangadi on 23.03.26 due to fever. On 24.03.2026, she developed severe fever and body pain and sought care at Dr. Alis's Clinic, Padinjarangadi, and Sukapuram Hospital, Edappal. Due to clinical deterioration, including hypotension and decreased platelet count, she was referred to Jubilee Mission Hospital, Thrissur, where she was where her blood sample tested positive for Neisseria meningitidis on 26.03.2026 (Blood Culture and Sensitivity paired with BioFire BCID Panel). The patient is currently hospitalised at Daya General Hospital, Thrissur. Public health measures, including surveillance and health education, were carried out.
<b>MP/NEE/2026/13/527</b>	<b>Madhya Pradesh</b>	<b>Neemuch</b>	<b>Human Rabies</b>	1	1	22-02-2026	<b>Under Control</b>	A case was reported from Village Morwan, Block Jawad, District Neemuch. District RRT investigated the case. The case was a 45-year-old male residing in Village Kushalpur, District Bhilwara, Rajasthan, and was engaged in door-to-door blanket selling. On the night of 21.02.2026, he sustained an animal bite (jackal) while attempting to rescue his cow. He sought medical care the next day and received anti-rabies vaccination, completing four doses. On 18.03.2026, his condition worsened with a mental shock and the discharge of sputum. After visiting a nearby hospital, he was referred to Udaipur Medical College, where he was declared to be a case of Human Rabies. Subsequently, he was taken to District Hospital, Neemuch; however, despite medical advice for further referral, he succumbed to the illness. All close family contacts were provided with anti-rabies vaccination.
