District wise disease alerts-outbreaks reported in the 3<sup>rd</sup> week 2026

3<sup>rd</sup> Week Map

Unique ID.	Name of State-UT	Name of District	Disease- Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments- Action Taken
AP/PAP/2026/3/56	Arunachal Pradesh	Papum Pare	Measles	4	0	13-01-2026	13-01-2026	Under Control	Cases of fever with rash and cough were reported from Village 6-Kilo, Sub-district EAC Itanagar, District Papum Pare. District RRT investigated the outbreak. The affected age group was 5-8 years. 4 blood samples were collected and sent to GMC, Guwahati, Assam. 4 samples were found to be positive for measles, tested by IgM ELISA. MR vaccination was not given to cases. Cases were treated symptomatically. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
AS/BIS/2026/3/57	Assam	Biswanath	Dysentery	150	0	18-01-2026	18-01-2026	Under Surveillance	Cases of loose stools and headache were reported from Moghai Ojha Bihutoli, Sub-district Biswanath, District Biswanath. District RRT investigated the outbreak. Most of the cases were in the age group of 12-72 years. The cases had consumed a meal at a religious ceremony. 2 Dry food samples, 2 water samples and 10 stool samples were collected and sent to the IDSP-DPHL, Biswanath for analysis. The 2 water samples were found satisfactory by H <sub>2</sub> S test. The 10 stool samples tested negative for

									cholera by Microscopy Hanging Drop Preparation. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>AS/KOK/2026/3/58</b>	<b>Assam</b>	<b>Kokrajhar</b>	<b>Measles</b>	30	0	12-01-2026	12-01-2026	<b>Under Surveillance</b>	Cases of fever with small red rashes, Koplik's spot inside the mouth, coryza and cough were reported from Village Jonaligaon FV and Rajendrapur, Sub-district Gossaigaon (Pt), District Kokrajhar. District RRT investigated the outbreak. The affected age group was <9 months-30 years. All affected individuals are given symptomatic treatment. 5 serum and throat swab samples were tested at GMCH, Guwahati, and were positive for Measles by IgM ELISA. Regarding vaccination status, 22 cases had received MR1, and 17 cases had received MR2. Community awareness and health education given by the peripheral team on the spread of infection, isolation of cases, hygiene and sanitation.
<b>DL/SOU/2026/3/59</b>	<b>Delhi</b>	<b>South East</b>	<b>Meningococcal Meningitis</b>	1	0	15-01-2026	15-01-2026	<b>Under Surveillance</b>	A 71-year-old male was admitted to the Institute of Brain and Spine Centre, Lajpat Nagar, with complaints of fever for two days, neck rigidity, vomiting and headache. Blood and CSF samples were collected, and <i>Neisseria meningitidis</i> was isolated in the blood sample at IBS Center, New Delhi. The patient was put on empirical therapy. The patient was

									a known case of diabetes. The patient is admitted due to other medical conditions. Chemoprophylaxis was recommended for family members and exposed healthcare staff. The hospital was advised to ensure strict biomedical waste management and periodic microbiological sampling of ICU and sanitation areas. Community awareness and health education given by the peripheral team on hygiene and sanitation.
<b>JH/JAM/2026/3/60</b>	<b>Jharkhand</b>	<b>Jamtara</b>	<b>Chickenpox</b>	6	0	17-01-2026	17-01-2026	<b>Under Surveillance</b>	Cases of fever with rash were reported from Village Gwalpara, Sub-district Karma Tanr Vidyasagar, District Jamtara. District RRT investigated the outbreak. The affected age group was 8-60 years. Blood samples from all cases were tested at RIMS Microbiology Lab, Ranchi. 4 samples tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
<b>KN/HAS/2026/3/61</b>	<b>Karnataka</b>	<b>Hassan</b>	<b>Chickenpox</b>	25	0	12-01-2026	13-01-2026	<b>Under Surveillance</b>	Cases of fever with rash were reported from Village Kadegarje, Sub -district Belur, District Hassan. District RRT investigated the outbreak. The affected age group was 5-44 years. 11 blood samples and vesicular samples were collected from affected cases and sent NIV Bengaluru. 7 cases tested positive for <i>V. zoster</i> (IgM ELISA).

									Chickenpox. Active fever and rash surveillance were undertaken. Vitamin A supplementation was administered. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
<b>KL/ERN/2026/62</b>	<b>Kerala</b>	<b>Ernakulam</b>	<b>Chickenpox</b>	5	0	15-01-2026	18-01-2026	<b>Under Surveillance</b>	Cases of fever and vesicular blisters were reported from the Hostel of Sreesankaracharya University, Sub-district Aluva, District Ernakulam. District RRT investigated the outbreak. The affected age group was 19-20 years. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
<b>KL/ERN/2026/63</b>	<b>Kerala</b>	<b>Ernakulam</b>	<b>Acute Gastroenteritis</b>	91	0	12-01-2026	14-01-2026	<b>Under Surveillance</b>	Cases of fever, loose stools, vomiting, abdominal pain and nausea were reported from Chittatukara Grama Panchayath, Village Vadakkekara, Sub-district Paravur, District Ernakulam. District RRT investigated the outbreak. Cases across all age groups were affected. All cases had a history of consuming food at a marriage function. Cases were treated at different hospitals. 1 stool sample of a symptomatic case and 1 water sample were tested at RPH Lab for bacteriological analysis. Both stool and water samples were reported sterile. Community

									awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>KL/ERN/2026/64</b>	<b>Kerala</b>	<b>Ernakulam</b>	<b>Acute Gastroenteritis</b>	26	0	12-01-2026	12-01-2026	<b>Under Control</b>	Cases of loose stools and fever were reported from Village Kadungalloor (CT), Sub-district Paravur, District Ernakulam. District RRT investigated the outbreak. The affected age group was 3-44 years. All cases had a history of consuming ice candy from a mobile ice cream shop. The cases were treated symptomatically. 1 water sample was sent to RPH Lab Ernakulam and resulted satisfactory. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>KL/PAL/2026/65</b>	<b>Kerala</b>	<b>Palakkad</b>	<b>Hepatitis A</b>	26	0	12-01-2026	14-01-2026	<b>Under Surveillance</b>	Cases of fever, abdominal pain, urinary tract infection, nausea, vomiting and fatigue were reported from Village Vilayur, Sub-district Pattambi, District Palakkad. District RRT investigated the outbreak. The affected age group was 6-60 years. 3 water samples were collected from the wells and sent to Modern Biotech for bacteriological analysis. The samples showed the presence of coliform bacteria; however, E. coli

									was not detected. 7 cases were tested for HAV ELISA, out of which 5 tested positive from EMS Co-operative Hospital, Perinthalmanna, Nizar Hospital, Valanchery and Shifa Hospital, Koppam lab. Further, out of 6 serum samples collected and sent to IPH Laboratory, Palakkad, 5 samples tested positive for Hepatitis A (IgM ELISA). Super-chlorination was conducted. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>KL/PAL/2026/66</b>	<b>Kerala</b>	<b>Palakkad</b>	<b>Hepatitis A</b>	12	0	12-01-2026	12-01-2026	<b>Under Surveillance</b>	Cases were reported from Village Karimpuzha-II (ward 13), Sub-district Ottappalam, District Palakkad. District RRT investigated the outbreak. The cluster of cases involved five households with a total population of approximately 28 residents. Twelve individuals from these households presented with symptoms of fever, jaundice, nausea, and fatigue. Among the five affected households, four belonged to close family members. The remaining household consumed drinking water from a common well used by the other families. Of the twelve symptomatic individuals, 2 tested positive for Hepatitis A at a private

									laboratory (National Lab, Mannarkkad). One was ELISA positive and the other was Chemiluminescence Assay (CLIA) positive. Serum samples from four symptomatic individuals were subsequently collected and sent to the IPHL for Hep A ELISA testing. However, all four samples tested negative. Cases were treated at PHC Elambuassery. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>KL/THI/2026/67</b>	<b>Kerala</b>	<b>Thiruvananthapuram</b>	<b>Acute Gastroenteritis</b>	27	0	09-01-2026	12-01-2026	<b>Under Surveillance</b>	Cases of pain in abdomen and loose motion were reported from Village Nemom, Sub-district/District Thiruvananthapuram. District RRT investigated the outbreak. Cases were students of Swami Vivekananda Mission Central School, Koliyakode. No common intake of food was detected. Cases were treated at health facilities. Cases were in the age group 5-14 years. 1 stool culture tested positive for Shigella at Neyyar Medicity, Kattakkada. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>MP/BUR/2026/3/68</b>	<b>Madhya Pradesh</b>	<b>Burhanpur</b>	<b>Measles</b>	15	0	16-01-2026	16-01-2026	<b>Under Control</b>	Cases of fever with maculo-papular rash, and cough were reported from Village Baroli, Sub-district/District Burhanpur. District RRT

									investigated the outbreak. Active search for fever cases was done in the affected area. Cases were treated at CHC Shahpur. Cases were in the age group 2-25 years. 5 blood samples collected and sent to GMC Bhopal and were found to be positive for Measles. All cases were vaccinated. Vitamin A solution was given to cases. Teachers and students at Anganwadi center and Government school were sensitized on precautionary measures to prevent spread of infection. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
<b>MP/NAR/2026/3/69</b>	<b>Madhya Pradesh</b>	<b>Narsinghpur</b>	<b>Chickenpox</b>	9	0	17-01-2026	17-01-2026	<b>Under Surveillance</b>	Cases of fever with rash and itching were reported from Village Padam, Sub-district Tendukheda, District Narsinghpur. District RRT investigated the outbreak. Active search for fever cases was done in the affected area. Cases were in the age group 2-38 years. 2 blood and rashes fluid samples were collected and tested at ICMR Jabalpur. Both samples tested positive for <i>V. zoster</i> (IgM ELISA). Cases were treated symptomatically. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

<b>MH/CHA/2026/3/70</b>	<b>Maharashtra</b>	<b>Chandrapur</b>	<b>Acute Diarrhoeal Disease</b>	19	0	12-01-2026	12-01-2026	<b>Under Surveillance</b>	Cases of loose watery stools were reported from Village Singadzari, Sub-district Sindewahi, District Chandrapur. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Wasera. ORS packets were given to cases. 3 stool samples and 5 water samples were collected and sent to DPHL Chandrapur. Stool Samples tested negative for cholera by culture. Water samples were potable. Both children and adults were affected. Chlorine tablets were distributed to the households. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
<b>MH/NAN/2026/3/71</b>	<b>Maharashtra</b>	<b>Nanded</b>	<b>Acute Diarrhoeal Disease</b>	17	0	14-01-2026	15-01-2026	<b>Under Surveillance</b>	Cases of loose motions, stomach pain, and vomiting were reported from Village Wadgaon, Sub-district/District Nanded. District RRT investigated the outbreak. Cases were workers at a sugarcane farm who were treated at Government Medical College (GMC) Nanded. All cases were treated. ORS packets were given to cases. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
<b>OR/KAL/2026/3/72</b>	<b>Odisha</b>	<b>Kalahandi</b>	<b>Acute Gastroenteritis</b>	15	0	16-01-2026	17-01-2026	<b>Under Control</b>	Cases were reported from Village Dulkibandh, Sub-district Jayapatna, District Kalahandi.

									District RRT investigated the outbreak. Cases developed symptoms of loose motion, nausea and abdominal pain 4-5 hours after consuming food rice and daal in lunch. Cases were treated at CHC Kalampur. ORS packets were given to cases. Cases were in the age group 17-60 years. 3 stool samples collected, tested negative for cholera by culture. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>OR/KEN/2026/3/73</b>	<b>Odisha</b>	<b>Kendujhar</b>	<b>Suspected Food Poisoning</b>	27	0	15-01-2026	16-01-2026	<b>Under Surveillance</b>	Cases of loose motion, vomiting and abdominal pain were reported from Village Purumunda, Sub-district Ghatgaon, District Kendujhar. District RRT investigated the outbreak. People had consumed food in a death anniversary ritual ceremony. All cases were treated symptomatically. Cases were in the age group 4-70 years. Community awareness and health education given by the peripheral team on safe food habits and drinking water, hygiene and sanitation.
<b>TN/PUD/2026/3/74</b>	<b>Tamil Nadu</b>	<b>Pudukkottai</b>	<b>Mumps</b>	5	0	12-01-2026	12-01-2026	<b>Under Surveillance</b>	Cases of fever were reported from Kalkudiyirupu Primary School, Village Kallur Kudiyruppu, Sub-district Thirumayam, District Pudukkottai. District RRT investigated the outbreak. The

									affected age group was 6-15 years. Serum samples and throat swabs were collected from all cases. Samples were tested by RT-PCR, Rubella IgM ELISA, Mumps IgM ELISA, and Anti-Measles IgM ELISA. 4 samples tested positive for Mumps by IgM ELISA. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
<b>WB/PAR/2026/3/75</b>	<b>West Bengal</b>	<b>24 Paraganas North</b>	<b>Acute Diarrhoeal Disease</b>	83	0	17-01-2026	17-01-2026	<b>Under Surveillance</b>	Cases of loose watery stools were reported from the border area of Khardah Municipality and Patulia GP, Sub-district Barrackpur - II, District 24 Paraganas North. RRT from Block and ACMOH Barrackpore office visited the affected area. Cases were treated at Bandipur BPHC. 3 rectal swab samples collected and sent to District Public Health Lab BGMCH showed growth of normal gut flora. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
<b>WB/PAR/2026/3/76</b>	<b>West Bengal</b>	<b>24 Paraganas North</b>	<b>Nipah Virus</b>	2	1	13-01-2026	14-01-2026	<b>Under Surveillance</b>	Cases were reported from Narayana Multispeciality Hospitals, District North 24 Paraganas. Both patients were 25 years old; one female presented with fever, cough and neurological symptoms, and one male presented with fever and chills. Both were

									<p>admitted on 04.01.2026. Blood samples were collected and sent to AIIMS Kalyani on 11.01.2026, where they tested positive for Nipah virus by RT-PCR, with confirmation by NIV Pune. The male patient recovered and was discharged, while the female patient was managed as per treatment protocol. The female patient died on 12.02.2026. The asymptomatic contacts were kept under surveillance and symptomatic contacts were quarantined at home. A total of 93 samples from Narayana Super Specialty Hospital and 103 samples from Purba Bardhaman District were sent for testing. All 93 samples from Narayana Super Specialty Hospital tested negative, and 84 samples from Purba Bardhaman District also tested negative. Surveillance and contact tracing activities were undertaken. Community awareness and health education were conducted by the peripheral health team focusing on infection prevention, hygiene and sanitation measures.</p>
