Unique ID.	Name of State/UT	Name of District	Disease/ Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments/ Action Taken
AS/DHE/2025/32/1448	Assam	Dhemaji	Chickenpox	11	0	04-08- 2025	06-08- 2025	Under Control	Cases were reported from Village Chahaki Chowk, Sub-District Sissibargaon, District Dhemaji. Cases presented with symptoms of fever and skin rash. District RRT investigated the outbreak. Cases were below 15 years of age. Cases were treated symptomatically. Out of 7 blood samples collected and sent to ICMR-RMRC Dibrugarh, 3 samples were positive for Varicella Zoster (IgM ELISA). Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

AS/NAG/2025/32/1450	Assam Nagaon	Nagaon Acute Diarrhoeal Disease	24	0	05-08-2025	06-08-2025	Under Control	Cases were reported from Village Kachupit, Sub-District Nagaon, District Nagaon. Cases are presented with loose motion, fever, vomiting and headache. District RRT investigated the outbreak. The affected age group was 4-65 years. 3 rectal swabs were collected and tested at Microbiology department, Nagaon Medical College & Hospital (NMCH). 2 water samples from the drinking water sources of the affected families were collected and sent to DPHL, IDSP, Nagaon. All the rectal swab samples culture reports showed the growth of normal gut flora. Both the water samples were found to be of Class-IV quality and unsatisfactory for drinking in the MPN test. Outbreak may be attributed to poor quality drinking water and unhygienic living conditions of the affected cases in the area. Community awareness and health education given by the peripheral team on hygiene, sanitation & safe drinking water practice.
