Disease alerts/outbreaks reported during this week (N=53)

Disease wise no of outbreaks reported under IDSP during 2021-2025 till 37th wk of Every Year

2021 2022 2023 2024 2025

Unique ID.	Name of State-UT	Name of District	Disease-Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments- Action Taken
AP/NTR/2025/37/1682	Andhra Pradesh	Ntr	Cholera	358	0	11-09-2025	12-09-2025	Under Surveillance	Cases of vomiting and loose motion were reported from Vijayawada Town, Sub-District Vijayawada (Urban), District Ntr. District RRT investigated the outbreak. House to house survey was done. The affected age group was 2-77 years. Cases were treated at a health camp established in the affected area. 10 patients were treated at GGH. Out of 55 stool samples collected, 3 samples tested positive for <i>V. cholerae</i> by culture. Out of 54 water samples collected and sent to Regional Lab, Guntur, 6 samples were non-potable. The sanitation staff from VMC conducted announcements and community drives in affected areas to educate residents on safe water consumption practices, hygienic food preparation methods, and the critical importance of early symptom reporting. Water supply to the area was temporarily stopped and potable water was supplied through tankers and water bubbles. Community awareness and health education given by the peripheral team on safe drink

									water and food habits, hygiene and sanitation.
AP/VIS/2025/37/1683	Andhra Pradesh	Visakhapatnam	Suspected Food Poisoning	25	0	06-09-2025	08-09-2025	Under Control	Cases were reported from Village Adaviv Aram, Sub-District Visakhapatnam (Rural, District Visakhapatnam. Cases presented with loose motion, vomiting and abdominal pain after consuming food from a hotel. Cases were students of Vedam Nadam Patasala. District RRT investigated the outbreak.

									Cases were treated at RHC Simhachalam. Cases were in the age group 8-22 years. 2 water samples collected and sent to RPHL Visakhapatnam were non-potable. 1 stool sample collected and sent to KGH Visakhapatnam showed growth of normal gut flora. Community awareness and health education given by the peripheral team on safe food habits, hygiene and sanitation.
AP/YSR/2025/37/1684	Andhra Pradesh	Y.S.R.	Dengue	13	0	10-09-2025	11-09-2025	Under Surveillance	Cases of fever were reported from Village AwcKammavaripalli-AwcKodigandla Palli, Sub-District Muddanur, District Y.S.R. District RRT investigated the outbreak. Total population of the affected area was 360. House to house fever survey was done. Cases were treated symptomatically. Cases were in the age group 6-40 years. Out of 5 serum samples collected, 1 sample tested positive for Dengue (NS1 ELISA). Source reduction activities were done. Community awareness and health education given by peripheral team on vector control measures, hygiene and sanitation.
AS/DHE/2025/37/1685	Assam	Dhemaji	Acute Diarrhoeal Disease	64	0	12-09-2025	12-09-2025	Under Surveillance	Cases of loose motion and vomiting were reported from Village Tingiri Gaon, Sub-District Gogamukh, District Dhemaji. District RRT investigated the outbreak. Cases were treated at a medical camp established in the locality. Cases were in the age group 4-80 years.

									1 water sample and 5 stool samples were collected and sent to DPHL Dhemaji. The MPN test indicated that the water was potable, while stool culture showed growth of <i>Escherichia coli</i> in 2 samples and normal gut flora in 3 samples. The tests used for confirmation were MPN and aerobic incubation. The outbreak was likely linked to the Nam Pasanga event conducted at the Tingiri Village Namghar. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
AS/MAJ/2025/37/1686	Assam	Majuli	Food Poisoning	74	0	13-09-2025	14-09-2025	Under Surveillance	Cases were reported from Village Goal Gaon, Sub-District Majuli, District Majuli. District RRT investigated the outbreak. The affected age group was 5-70 years. Cases presented with symptoms of loose motion, vomiting and headache after consumption of boot-mogumaah during a <i>Naam-Kirtan</i> ceremony at a Namghar. 6 rectal swabs, 2 drinking water samples, and 1 sample each of chickpeas and mogu dal (whole/split) were collected. The rectal swab and water samples were sent to JMCH, Jorhat, while the food samples were sent to SPHL, Guwahati. Laboratory results showed rectal swabs positive for <i>Enteropathogenic E. coli</i> . The water samples were found potable, and the food samples

									met the prescribed Food Safety Standards. The diagnosis was confirmed through rectal swab culture. Cases were treated at MPHC Karatipar. Community awareness and health education given by the peripheral team on safe food habits, hygiene and sanitation.
CT/GAU/2025/37/1687	Chhattisgarh	Gaurella Pendra Marwahi	Food Poisoning	26	0	08-09-2025	11-09-2025	Under Control	Cases were reported from Village Salheghori, Sub-District Pendra Road Gorella, District Gaurella Pendra Marwahi. Cases presented with diarrhoea and vomiting. District RRT investigated the outbreak. People developed illness after consuming mushrooms. 2 stool samples were sent to CIMS, Bilaspur for culture, and both tested positive for <i>E. coli</i> . 1 water sample was also sent to CIMS, Bilaspur for bacteriological testing and was found to be contaminated. A health camp was organized in the affected area. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
CT/MAH/2025/37/1688	Chhattisgarh	Mahasamund	Acute Diarrhoeal Disease	21	0	09-09-2025	12-09-2025	Under Control	Cases were reported from Village Paita, Sub-District Basna, District Mahasamund. Cases presented with diarrhoea and vomiting. District RRT investigated the outbreak. Contaminated bore water might be the cause of the outbreak. A health camp was organized in the affected area. Cases were treated symptomatically. Super

									chlorination of the borewell was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
HR/PAN/2025/37/1689	Haryana	Panipat	Acute Diarrhoeal Disease	15	0	08-09-2025	09-09-2025	Under Surveillance	Cases of vomiting and abdominal pain were reported from Deshraj Colony under UPHC Rajeev Colony, District Panipat. District RRT investigated the outbreak. Cases were treated symptomatically. All 7 stool samples collected and sent to DPHL Panipat tested negative for Vibrio Cholera by culture. Out of 34 water samples collected and sent to DPHL, Civil Hospital, Panipat, 1 sample was unfit in bacteriological testing.
