33rd week**District wise disease alerts/outbreaks reported in the 33rd week 2025**

Unique ID.	Name of State/UT	Name of District	Disease/ Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments/ Action Taken
AR/LON/2025/33/1496	Arunachal Pradesh	Longding	Measles	10	0	13-08-2025	13-08-2025	Under Surveillance	Cases of fever with rash were reported from Niaunu Village, Sub-District Longding HQ, District Longding. District RRT investigated the outbreak. Cases were in the age group of 10 months to 10 years. All the cases were not vaccinated. Symptomatic treatment was given to cases. 10 blood samples were collected and sent to GMC Guwahati, Assam, where 5 were found positive for Measles, tested by IgM ELISA. The cases were given 2 doses of Vitamin A solution. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

AS/BAR/2025/33/1497	Assam	Barpeta	Suspected Food Poisoning	4	3	14-08-2025	16-08-2025	Under Surveillance	<p>Cases were reported from Village Mandia Gaon, Sub-District Baghbor, District Barpeta. Cases presented with vomiting and loose watery stool. District RRT investigated the outbreak. The affected age group was 19-40 years. Three deaths were reported. A 40-year-old male died on 13.08.2025 with hypovolemic shock due to acute gastroenteritis, a 22-year-old male died on 14.08.2025 and a 37-year-old female died on 15.08.2025. 1 sample of uncooked pulse, two samples of uncooked rice, and water samples were collected. The uncooked masur dal and rice samples conformed to prescribed standards. However, the water sample was found unsafe—chemically (pH 6.2 against standard 6.5–8.5) and microbiologically (TNTC coliforms, E. coli detected). The kitchen area was observed to have inadequate hygiene, improper food storage, and lapses in cleanliness. Community awareness and health education given by the peripheral team on safe water and food habits, hygiene and sanitation.</p>
---------------------	-------	---------	--------------------------	---	---	------------	------------	--------------------	--

AS/DIB/2025/33/1498	Assam	Dibrugarh	Cholera	29	2	16-08-2025	17-08-2025	Under Surveillance	<p>Cases were reported from Village Tingri T.E. Co-Darkhasta, Sub-District Tengakhata, District Dibrugarh. Cases presented with loose motion and vomiting. District RRT investigated the outbreak. The affected age group was 9 months-60 years. Cases were treated at a health camp organized in the locality. Two deaths were reported in a 52-year-old male with a history of diabetes and hypotension who developed diarrhoea and vomiting and died on 16.08.2025, and a 13-year-old female died on 17.08.2025. 1 rectal swab and 1 water sample was collected. The rectal swab tested positive for <i>Vibrio cholerae</i> O1 serotype Ogawa at SRL, Microbiology Department. The MPN test of the water sample indicated that it was non-potable. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.</p>
---------------------	-------	-----------	---------	----	---	------------	------------	--------------------	---

AS/DIB/2025/33/1499	Assam	Dibrugarh	Cholera	15	2	15-08-2025	16-08-2025	Under Surveillance	<p>Cases were reported from Village Mereli Pathar, Sub-District Chabua, District Dibrugarh. Cases presented with loose stool and vomiting. District RRT investigated the outbreak. The affected age group was 11 months-70 years. Two deaths were reported: a 12-year-old male died on 09-08-2025 due to loose stools with abdominal pain and vomiting, and a 70-year-old female died on 11-08-2025 due to diarrhoea and vomiting. 1 rectal swab and 2 water samples were collected and tested at the State Referral Laboratory (SRL), Microbiology Department, AMCH, Dibrugarh. The rectal swab was positive for <i>Vibrio cholerae</i> O1 serotype Ogawa. 2 water samples collected were non-potable for drinking. ORS and Zinc tablets were distributed. Community awareness and health education given by the peripheral team on safe drinking water, food habits, hygiene and sanitation.</p>
---------------------	-------	-----------	---------	----	---	------------	------------	--------------------	--

AS/LAK/2025/33/1500	Assam	Lakhimpur	Suspected Food Poisoning	72	0	17-08-2025	17-08-2025	Under Surveillance	Cases were reported from Village Deobil Chamaguri, Sub-District Naobaicha, District Lakhimpur. Cases presented with fever, headache, abdominal pain and loose motion after consuming food in a shraddha ceremony. District RRT investigated the outbreak. Drinking water source was from a tube well without a proper platform. 4 rectal swab samples were collected and tested at the District Public Health Laboratory (IDSP), Telahi Model Hospital; no significant pathogenic growth was observed. 3 water samples were tested at the same laboratory, showing intermediate results for drinking purpose (MPN 9/100 ml in two samples and 6/100 ml in one sample), with all samples slightly positive for H ₂ S test. ORS packets were given to cases. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
---------------------	-------	-----------	--------------------------	----	---	------------	------------	--------------------	---

AS/SON/2025/33/1501	Assam	Sonitpur	Acute Diarrhoeal Disease	86	0	14-08- 2025	14-08- 2025	Under Control	Cases were reported from Tezpur urban area, Sub-District Tezpur, District Sonitpur. Cases presented with multiple episodes of vomiting and loose motion. District RRT investigated the outbreak. The affected age group was 2-76 years. Two families from the affected locality travelled to Bhopal for Sawan Pooja and returned on 12-08-2025. Symptoms began the next day (13-08-2025) in all family members, indicating a possible exposure during travel or shortly after return. Cases were treated at Kanaklata Civil Hospital and Tezpur Medical College. All 21 stool samples collected and sent to TMCH for culture, showed growth of normal gut flora. Water samples collected were found unsatisfactory for drinking purpose. Alternate drinking water supply was arranged by PHED. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
---------------------	-------	----------	--------------------------------	----	---	----------------	----------------	------------------	--

CT/MUN/2025/33/1502	Chhattisgarh	Mungeli	Food Poisoning	79	0	13-08-2025	14-08-2025	Under Control	Cases were reported from Village Chinu, Sub-District Mungeli, District Mungeli. Cases presented with loose motions after consuming food in a death ceremony. District RRT investigated the outbreak. The affected age group was 6-79 years. Cases were treated at a health camp established in the locality. 5 stool samples collected and sent to CIMS Bilaspur tested negative for cholera by culture. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
CT/RAJ/2025/33/1503	Chhattisgarh	Rajnandgaon	Acute Diarrhoeal Disease	16	0	14-08-2025	14-08-2025	Under Surveillance	Cases of loose motion and vomiting were reported from Village Bairagi Bhedi, Sub-District Chhuriya, District Rajnandgaon. District RRT investigated the outbreak. Pipeline leakages were observed in the locality. Symptomatic treatment was given to cases. 7 cases were treated at CHC Chhuriya & GMCH Rajnandgaon. 2 stool samples and 2 water samples were collected and sent to GMC RJN Lab. Stool samples tested negative for cholera by culture. Water samples were potable. Pipeline leakages were repaired by the gram panchayat. Chlorine tablets were distributed to households. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.

GJ/AHM/2025/33/1504	Gujarat	Ahmadabad	Crimean-Congo Haemorrhagic Fever	1	1	14-08- 2025	14-08- 2025	Under Control	Case was reported from Village Pisawada, Sub-District Dholka, District Ahmadabad. A 46-year-old male presented with disorientation and confusion and was admitted to SVP hospital Ahmedabad where he was found positive for CCHF. The patient died on 08-08-2025 due to illness. Blood sample collected and sent to NIV Pune, tested positive for Nairo virus. District RRT investigated the outbreak. Infection Prevention and Control measures were enhanced to prevent hospital staff and patients from HAI. Health, Animal husbandry and Rural development department teams conducted house to house survey in the affected area. Health education was given on by the peripheral team on hygiene and sanitation.
----------------------------	----------------	------------------	---	---	---	----------------	----------------	--------------------------	---

HR/YAM/2025/33/1505	Haryana	Yamunanagar	Hepatitis A	70	0	11-08-2025	11-08-2025	Under Control	Cases of loose watery stools, headache and stomach pain were reported from Village Mukarabpur, Sub-District Chhachhrauli, District Yamunanagar. District RRT investigated the outbreak. The affected age group was 2-80 years. House to House survey conducted by Medical and paramedical teams. First aid post established in the affected area. All cases were treated symptomatically. All 9 stool samples collected and sent to DPHL (IDSP) Yamuna Nagar tested negative for cholera by culture. 4 blood samples collected tested positive for Hepatitis A (IgM ELISA). Out of 14 water samples collected and send to DPHL (IDSP) for bacteriological test. 9 samples were unfit for drinking purpose. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
---------------------	---------	-------------	-------------	----	---	------------	------------	---------------	--

JK/BAR/2025/33/1506	Jammu and Kashmir	Baramulla	Jaundice	12	0	12-08-2025	12-08-2025	Under Surveillance	Cases were reported from Village Odura, (Hajam mohalla), CHC Fatehgarh, Sub-District/District Baramulla. Cases presented with loss of appetite, abdominal pain and yellow coloured urine. Block RRT along with District RRT investigated the outbreak. Cases were treated at a health camp organized in the locality. Cases were in age group 8-50 years. Out of 12 blood samples collected and sent to DPHL Baramulla, 3 samples tested positive for Hepatitis A (IgM ELISA). 3 water samples collected were potable. Chlorine tablets were distributed to the households. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
JK/KAT/2025/33/1507	Jammu and Kashmir	Kathua	Dengue	23	0	12-08-2025	13-08-2025	Under Surveillance	Cases of fever with bodyache and myalgia were reported from Ward 11, Kathua urban, Sub-District/District Kathua. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated symptomatically. 61 blood samples collected and sent to IDSP DPHL Kathua, 23 samples tested positive for Dengue (NS1 ELISA). Source reduction activities were undertaken in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.

JK/KAT/2025/33/1508	Jammu and Kashmir	Kathua	Chickenpox	11	0	11-08-2025	11-08-2025	Under Surveillance	Cases of fever with rash were reported from Bal Ashram (Ward No. 17), Sub-District/District Kathua. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were treated symptomatically. Cases were in the age group 10-15 years. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JK/SHO/2025/33/1509	Jammu and Kashmir	Shopian	Chickenpox	11	0	13-08-2025	13-08-2025	Under Control	Cases of fever with rash were reported from Village Molu Dange Rpora, Sub-District Barbugh, District Shopian. District RRT investigated the outbreak. Cases were treated symptomatically. Cases were in the age group 4-30 years. All 5 serum samples collected and sent to DPHL Shopian tested positive for Varicella zoster virus (IgM ELISA). Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

JH/GAR/2025/33/1510	Jharkhand	Garhwa	Acute Diarrhoeal Disease	15	1	11-08- 2025	11-08- 2025	Under Control	Cases were reported from Village Buka, Sub-District Bhawnathpur, District Garhwa.
