Cases were from Palaash Boys Hostel, who were in the age group of 12-17 years. 6 blood samples were collected and sent to DPHL, JLNM. 3 samples were positive for <i>Varicella zoster</i> by IgM ELISA. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
KN/HAV/2026/10/380	Karnataka	Haveri	Chickenpox	6	0	05-03-2026	05-03-2026	Under Surveillance	Cases of fever followed by vesicular rash were reported from Village Byadagi C, Sub-District Byadgi, District Haveri. District RRT investigated the outbreak. The affected age group was <5-14 years. 5 serum samples were tested at Bangalore Medical College and Research Institute. 2 samples were positive for Chickenpox by IgM ELISA. House-to-house surveillance

									was carried out. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
KL/ERN/2026/10/381	Kerala	Ernakulam	Hepatitis A	11	0	05-03-2026	07-03-2026	Under Surveillance	Cases of fever, vomiting, jaundice and myalgia were reported from HM School, Uliyannur, Kunjunnukkara of Ward 7 of Kadungallur Gramapanchayth, Sub-District Paravur, District Ernakulam. District RRT investigated the outbreak. The affected age group was 8-15 years. 2 serum samples were taken and sent to RPH Lab EKM and were found to be positive for HAV by IgM ELISA. The suspected source of the outbreak is the filter water. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/ERN/2026/10/382	Kerala	Ernakulam	Chickenpox	12	0	27-02-2026	04-03-2026	Under Surveillance	Cases of fever, myalgia and rashes were reported from Village and Sub-District Aluva, District Ernakulam. District and Block RRT investigated the outbreak. The affected age group was 6-7 years. Cases were students of Lower Primary school Poikattussery. The classroom was disinfected. Cases were diagnosed clinically. Community

									awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
KL/PAL/2026/10/383	Kerala	Palakkad	Dengue	48	0	03-03-2026	03-03-2026	Under Surveillance	Cases of fever were reported from Wards 5, 9, 10 and 16 of Village Akathethara, Sub-District Palakkad, District Palakkad. District RRT investigated the outbreak. The affected age group was 19-60 years. 4 serum samples tested positive for Dengue by IgM ELISA and 17 serum samples tested positive for Dengue by rapid NS1 ELISA. from Sai Hospital and District Co-operative Hospital, Palakkad. Most cases were seeking care at Sai Hospital and District Co-operative Hospital, Palakkad. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/THR/2026/10/384	Kerala	Thrissur	Chickenpox	8	0	02-03-2026	07-03-2026	Under Surveillance	Cases of fever with rash were reported from Village Maruthayur, Sub-District Chavakkad, District Thrissur. District RRT investigated the outbreak. The cases were students and the Headmistress of AMLP School, Pavaratty, who developed symptoms following a school tour. Most cases were in the age group of 5-14 years.

									Cases were diagnosed clinically. Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
MP/DIN/2026/10/385	Madhya Pradesh	Dindori	Malaria	17	0	04-03-2026	05-03-2026	Under Surveillance	Cases of fever with bodyache were reported from Village Khaipani Ryt., Sub-District Shahpura, District Dindori. District RRT investigated the outbreak. House-to-house survey was conducted. Out of 17 blood samples collected, 12 samples tested positive for Malaria (Plasmodium falciparum) by RDT. Anti-larval activities and fogging was done in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
MP/DIN/2026/10/386	Madhya Pradesh	Dindori	Malaria	32	0	04-03-2026	05-03-2026	Under Surveillance	Cases were reported from Village Jhamjhola, Sub-District Shahpura, District Dindori. District RRT investigated the outbreak. House-to-house survey was conducted. Out of 32 blood samples collected, 12 samples tested positive for Malaria (Plasmodium falciparum) by RDT. Anti-larval activities and fogging was done in the affected area. Community awareness and health education given by the peripheral team on vector

									control measures, hygiene and sanitation.
MP/EAS/2026/10/387	Madhya Pradesh	East Nimar	Chikungunya	54	0	06-03-2026	06-03-2026	Under Surveillance	Cases of fever with joint pain were reported from Village Rohani, Sub-District Punasa, District East Nimar. District RRT investigated the outbreak. House to house fever survey was done. The population of the affected village was 1590. Cases were treated at PHC Jamkota. The affected age group was 18-75 years. Out of 8 serum samples collected, 3 samples tested positive for Chikungunya (IgM ELISA). Anti-larval activities and fogging was done in the affected area. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
MP/RAT/2026/10/388	Madhya Pradesh	Ratlam	Measles	33	0	07-03-2026	07-03-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Ajabgarh, Sub-District Bajna, District Ratlam. District RRT investigated the outbreak. Active search for fever cases was done in the locality. All cases were treated symptomatically. Cases were in the age group 2-8 years. 4 serum samples collected, tested positive for Measles (IgM ELISA). Community awareness and health education was given by the peripheral

									team on isolation of cases, hygiene maintenance and proper nutrition.
MP/VID/2026/10/389	Madhya Pradesh	Vidisha	Measles	9	0	05-03-2026	05-03-2026	Under Surveillance	Cases of fever with rash were reported from Village Dharampur, Sub-District Sironj, District Vidisha. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were treated symptomatically. The affected age group was 1-9 years. Out of 5 serum samples collected and sent to GMC Bhopal, 4 samples tested positive for Measles (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MH/GAD/2026/10/390	Maharashtra	Gadchiroli	Fever	25	0	04-03-2026	07-03-2026	Under Surveillance	Cases of fever were reported from Village Murkhala, Sub-District Chamorshi, District Gadchiroli. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Lakhmapur Bori. Cases were treated at G.H. Gadchiroli. The affected age group was 1-44 years. 25 serum samples collected and sent to IGGM Nagpur, tested negative for Dengue and Scrub typhus by IgM ELISA. Source reduction activities were done in the affected area. Community

									awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
MH/LAT/2026/10/391	Maharashtra	Latur	Measles	9	0	05-03-2026	05-03-2026	Under Surveillance	Cases of fever with rash were reported from Village Borsuri, Sub-District Nilanga, District Latur. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were treated symptomatically. The affected age group was 2-11 years. Out of 5 serum samples collected, 3 samples tested positive for Measles (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MH/LAT/2026/10/392	Maharashtra	Latur	Measles	5	0	04-03-2026	04-03-2026	Under Surveillance	Cases of fever with rash were reported from Village Jaknal, Sub-District Udgir, District Latur. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were treated symptomatically. The affected age group was 2-11 years. 5 serum samples collected, tested positive for Measles (IgM ELISA). Community awareness and health education was given by the peripheral team on

									isolation of cases, hygiene maintenance and proper nutrition.
MH/NAS/2026/10/393	Maharashtra	Nashik	Hepatitis A	37	0	06-03-2026	07-03-2026	Under Surveillance	Cases of fever with nausea, pain in abdomen, yellowish sclera were reported from M H B Colony Satpur, Nashik city, District Nashik. District RRT investigated the outbreak. House to house survey was done. Total houses were 673 with a population of 2620. Cases were treated at NSKMC MHB Colony. Both children and adults were affected. Out of 9 serum samples collected and sent to NIV Pune, 7 samples tested positive for Hepatitis A (IgM ELISA). Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
OR/BAR/2026/10/394	Odisha	Bargarh	Acute Diarrhoeal Disease	20	0	04-03-2026	04-03-2026	Under Surveillance	Cases of loose motion with abdominal pain were reported from Village Goudpali, Sub-District Padmapur, District Bargarh. District and Block RRT investigated the outbreak. Active case search was conducted. The most affected age group was 45-59 years. 3 rectal swab samples were collected for culture test and 2 water samples were collected for H ₂ S and OT testing. The samples were sent to DPHL Bargarh.

									Water samples tested positive for H ₂ S and OT<0.01. No enteropathogenic organisms were found in the rectal swabs. Treatment was provided to all cases, and contact dose prophylaxis was administered to identified contacts. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
OR/JHA/2026/10/395	Odisha	Jharsuguda	Acute Diarrhoeal Disease	41	0	05-03-2026	05-03-2026	Under Surveillance	Cases of loose motion with abdominal pain were reported from Village Arda, Sub-District Laikera, District Jharsuguda. District and Block RRT investigated the outbreak. Active case search was conducted. The most affected age group was 45-59 years. After consuming the Prasad in the evening, multiple villagers began experiencing the symptoms. 4 rectal swab samples were collected for culture test and 3 water samples were collected for H ₂ S and OT testing. The samples were sent to DPHL Jharsuguda. Laboratory analysis confirmed the presence of enteric bacterial pathogens (Enterococcus spp., Enterobacter spp., and Serratia spp.) in stool samples of affected individuals. Citrobacter spp. was detected in one tubewell water sample. Treatment was provided to all cases,

									and contact dose prophylaxis was administered to identified contacts. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
OR/SAM/2026/10/396	Odisha	Sambalpur	Measles	14	0	03-03-2026	03-03-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Pulastya hostel VISSUT, Burla. Sub-District Sambalpur (M), District Sambalpur. District and block RRT investigated the outbreak. Active search for fever cases was done in the affected area. Cases were treated symptomatically. The affected age group was 20-22 years. All 5 blood samples collected and sent to DPHL Sambalpur, tested negative for Measles (IgM ELISA). Cases were clinically diagnosed with Measles. Vitamin A solution was given to cases. Community awareness and health education was given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.
RJ/BAR/2026/10/397	Rajasthan	Baran	Hepatitis A	20	0	06-03-2026	08-03-2026	Under Surveillance	Cases of abdominal pain, anorexia and yellow colored urine were reported from Village Phoonsra, Sub-District Baran, District Baran. District RRT investigated the outbreak. House to house survey was done. Pipeline

									leakages were observed in the locality. Cases were treated at a health camp organized in the locality. 3 patients were treated at the health facility. The affected age group was 2-45 years. Chlorine tablets were distributed to residents. PHED repaired pipeline leakages and super-chlorination of the water sources was done. 8 serum samples were collected and sent to Microbiology Lab MBS Hospital kota tested positive for Hepatitis A (IgM ELISA). Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
SK/PAK/2026/10/398	Sikkim	Pakyong	Acute Diarrhoeal Disease	27	0	06-03-2026	07-03-2026	Under Surveillance	Cases of loose motion were reported from Village Jaknal, Sub-District Rangpo, District Pakyong. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Rangpo and DHS Pakyong. Cases were Shangrila construction site workers residing at the mining area, Rangpo. Alternate drinking water supply was arranged in the locality. Chlorination of water sources was done. People were advised to consume boiled water for drinking purpose. The affected age group was 18-42 years. Water samples collected were unfit for drinking purpose. Community awareness and

									health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
TN/DIN/2026/10/399	Tamil Nadu	Dindigul	Chickenpox	8	0	05-03-2026	07-03-2026	Under Control	Cases of fever with vesicular rash were reported from Village Thandigudi, Sub-District Kodaikanal, District Dindigul. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were treated symptomatically. The affected age group was 5-17 years. 4 serum samples were tested at King Institute of Preventive Medicine and Research, Chennai. All tested positive for <i>Varicella zoster</i> by IgM ELISA. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
TN/KAL/2026/10/400	Tamil Nadu	Kallakurichi	Chickenpox	15	0	04-03-2026	05-03-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Thumbarampattu, Sub-District Kalvarayan Hills, District Kallakurichi. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were treated symptomatically. The affected age group was 1-11 years. 2 serum samples were tested at King Institute

									of Preventive Medicine and Research, Chennai. 1 sample tested positive for chickenpox by IgM ELISA. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
TN/KRI/2026/10/401	Tamil Nadu	Krishnagiri	Measles	35	0	06-03-2026	06-03-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village/Sub-District Bargur, District Krishnagiri. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were treated symptomatically. The affected age group was 1-7 years. 1 serum sample was tested at the Government Mohankumaramangalam Medical College Hospital, Salem. The sample tested positive for Measles by IgM ELISA. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
TN/THE/2026/10/402	Tamil Nadu	Theni	Fever	14	0	05-03-2026	08-03-2026	Under Surveillance	Cases of fever were reported from Village Erumalainaickanpatti, Sub-District Periyakulam, District Theni. District RRT investigated the outbreak. House to house survey was done. Cases were students of CSI Primary School,

									Erumalainayakkanpatti. All cases were treated at CHC Devathanapatti. The affected age group was 5-10 years. No Samples collected. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
TN/THR/2026/10/403	Tamil Nadu	Thiruvarur	Food Poisoning	67	0	06-03-2026	06-03-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Kodimangalam, Sub-District Koothanallur, District Thiruvarur. District RRT investigated the outbreak. Both children and adults were affected. On 5-3-26 afternoon, around 250 persons attended an engagement function.
