BH/GOP/2026/6/165	Bihar	Gopalganj	Measles	5	0	29-01-2026	06-02-2026	Under Surveillance	Cases of fever with rash were reported from Village Bhagwanpur, Sub-District Baikunthpur, District Gopalganj. District RRT investigated the outbreak. The affected age group was 2-20 years. All 5 blood samples collected and sent to AIIMS Patna tested negative for measles. Cases were clinically diagnosed with Measles. Community awareness and health education were given by the peripheral team on the spread of infection, isolation of cases, hygiene maintenance and proper nutrition.
BH/GOP/2026/6/166	Bihar	Gopalganj	Measles	5	0	28-01-2026	06-02-2026	Under Surveillance	Cases were reported from Village Bheria, Sub-District Thawe, District Gopalganj. District RRT investigated the outbreak. The affected age group was 4-39 years. 5 blood samples were tested by Anti-Measles IgM ELISA at AIIMS Patna. 1 sample tested positive for Measles. Community awareness and health education were given by the peripheral team on the spread of infection, isolation of cases, hygiene maintenance and proper nutrition.

BH/GOP/2026/6/167	Bihar	Gopalganj	Chickenpox	5	0	29-01-2026	05-02-2026	Under Surveillance	Cases of fever with rash were reported from Village Bhagwanpur, Sub-District Baikunthpur, District Gopalganj. District RRT investigated the outbreak. The affected age group was 2-20 years. 5 blood samples were tested by IgM ELISA at AIIMS Patna. All samples tested positive for <i>V. zoster</i> . Community awareness and health education were given by the peripheral team on the spread of infection, isolation of cases, hygiene maintenance and proper nutrition.
BH/GOP/2026/6/168	Bihar	Gopalganj	Chickenpox	5	0	28-01-2026	05-02-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Bheria, Sub-District Thawe, District Gopalganj. District RRT investigated the outbreak. The affected age group was 4-39 years. 5 blood samples were tested by IgM ELISA at AIIMS Patna. All samples tested positive for <i>V. zoster</i> . Community awareness and health education were given by the peripheral team on the spread of infection, isolation of cases, hygiene maintenance and proper nutrition.
BH/JEH/2026/6/169	Bihar	Jehanabad	Chickenpox	5	0	30-01-2026	03-02-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Dakra, Sub-District Makhdumpur, District Jehanabad. District RRT investigated the outbreak. Active search for fever cases was done. Symptomatic treatment was given to cases. 3 blood samples collected and sent to AIIMS Patna, tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education were given by

									the peripheral team on the spread of infection, isolation of cases, hygiene maintenance and proper nutrition.
BH/VAI/2026/6/170	Bihar	Vaishali	Chickenpox	11	0	01-02-2026	07-02-2026	Under Surveillance	Cases of fever with rash were reported from Village Sair Chak, Sub-District Hajipur, District Vaishali. District RRT investigated the outbreak. The affected age group was 3-35 years. Out of 5 blood samples collected and sent to AIIMS Patna, 1 sample tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education were given by the peripheral team on the spread of infection, isolation of cases, hygiene maintenance and proper nutrition.
CT/RAJ/2026/6/171	Chhattisgarh	Rajnandgaon	Chickenpox	5	0	03-02-2026	03-02-2026	Under Surveillance	Cases of fever with rash were reported from Village Dongargaon, Sub-District Dongargaon, District Rajnandgaon. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were given symptomatic treatment. The affected age group was 5-10 years. 6 serum samples collected and sent to NIRTH Jabalpur, tested negative for <i>V. zoster</i> (IgM ELISA). Cases were clinically diagnosed with chickenpox. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
GJ/MAH/2026/6/172	Gujarat	Mahisagar	Measles	12	0	06-02-2026	06-02-2026	Under Surveillance	Cases of fever with rash were reported from Nurani Colony, Sub-District Lunawada, District Mahisagar. District RRT investigated

									the outbreak. Active search for fever cases was done in the locality. All cases were treated symptomatically. 5 blood samples collected and sent to B.J.Medical College, Ahmedabad, tested positive for Measles (IgM ELISA). Cases were below 15 years of age. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
GJ/NAV/2026/6/173	Gujarat	Navsari	Measles	8	0	04-02-2026	04-02-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Vansda, Sub-District Bansda, District Navsari. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were treated symptomatically. The affected age group was 1-5 years. Out of 3 blood samples collected, 2 samples tested positive for measles (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
GJ/VAL/2026/6/174	Gujarat	Valsad	Measles	22	0	02-02-2026	02-02-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Dungara, Sub-District Vapi, District Valsad. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were treated at UPHC Dungara. The affected age group was 9 months to 5 years. All the cases were vaccinated (MR1 and MR2). 2 blood samples collected, tested positive for Measles (IgM ELISA). Community awareness

									and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JH/CHA/2026/6/175	Jharkhand	Chatra	Chickenpox	5	0	02-02-2026	02-02-2026	Under Surveillance	Cases of fever with rash were reported from Village Bandiadin, Sub-District Kunda, District Chatra. District RRT investigated the outbreak. Active search for fever cases was done in the affected area. Cases were treated at CHC Kunda. Cases were in the age group 6-16 years. Out of 5 blood samples collected and sent to ICMR-VRDL Ranchi, 4 samples tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
JH/WES/2026/6/176	Jharkhand	West Singhbhum	Malaria (P. falciparum & P. vivax)	97	0	31-01-2026	02-02-2026	Under Surveillance	Cases of fever with chills were reported from Village and Sub-District Goilkera, District West Singhbhum. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated with anti-malarial medicine. The affected age group was 5-15 years. Out of 186 blood samples collected, 97 samples (<i>P. falciparum</i> - 68, <i>P. vivax</i> - 16, Mixed - 13). Fogging was done in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KN/CHI/2026/6/177	Karnataka	Chikballapur	Measles	38	0	03-02-2026	03-02-2026	Under Surveillance	Cases of fever with rash were reported from Village Gowdagere, Sub-District Gauribidanur, District

									Chikballapur. District RRT investigated the outbreak. Active search for fever cases was done in the locality. A cluster of 3 cases were reported from 4th standard at Nanda School, Manchenahalli. Cases were treated at DH Chikballapur. 3 blood samples collected and sent to NIV Bengaluru, tested positive for Measles (IgM ELISA). The three children were fully immunized (MR1 & MR2). Surveillance activities were conducted in the school and the adjoining villages. Further, out of the 11 blood samples collected, 7 samples tested positive for Measles at NIV Bengaluru. All cases recovered. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
KN/HAV/2026/6/178	Karnataka	Haveri	Acute Diarrhoeal Disease	13	0	06-02-2026	06-02-2026	Under Control	Cases of loose watery stools were reported from Village Abalur, Sub-District Hirekerur, District Haveri. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Koda and GH Hirekerur. 1 patient was treated at DH Shivamogga. All cases recovered. Cases were in the age group 30-80 years. 5 stool samples, 1 blood sample, and 2 water samples were collected and sent to DPHL Haveri/IPHL for analysis. 5 stool samples tested negative for enteric pathogens by culture. Blood

									culture incubated at 37 °C showed no growth on alternate subculture for two days and remained sterile after 7 days of aerobic incubation. 2 water samples collected, were potable. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
KN/MAN/2026/6/179	Karnataka	Mandya	Chickenpox & Rubella	37	0	31-01-2026	05-02-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Kikkeri, Sub-District Krishnarajpet, District Mandya. District RRT investigated the outbreak. Cases were students of Karnataka Public Girls School, Kikkeri. Active search for fever cases was done in the school premises. Cases were treated at CHC Kikkeri. Cases were in the age group 5-14 years. 3 blood samples collected and sent to BMC Bangalore tested positive for <i>V. zoster</i> (IgM ELISA). Further, out of 2 blood samples collected & sent to NIV Bangalore, 1 sample tested positive for Rubella. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
KL/ERN/2026/6/180	Kerala	Ernakulam	Mumps	24	0	03-02-2026	04-02-2026	Under Surveillance	Cases of fever with parotid gland swelling, loss of appetite and weakness were reported from Guardian Angel Public School, Mannur, Sub-District Kunnathunad, District Ernakulam. District RRT investigated the outbreak. Students

									from UKG, LKG and LP were affected. Cases were treated at FHC Mazhuvannoor. Disinfection of classrooms was done. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
KL/ERN/2026/6/181	Kerala	Ernakulam	Acute Gastroenteritis	51	0	03-02-2026	04-02-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Bhavan's Adarsha Vidhyalaya, Village Thrikkakara North (Part), Sub-District Kanayannur, District Ernakulam. District RRT investigated the outbreak. Cases were students of LKG who reported symptoms of vomiting (2-3 episodes) and loose stools (3-4 episodes). Cases were treated at FHC Kakkanad. All cases recovered. Community awareness and health education given by the peripheral team on safe food habits and drinking water, hygiene and sanitation.

KL/KOT/2026/6/186	Kerala	Kottayam	Acute Diarrhoeal Disease	67	0	06-02-2026	08-02-2026	Under Surveillance	Cases of loose motion and vomiting were reported from Village Panachepally (ward 13), Sub-District Kanjirappally, District Kottayam. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Vizhikathodu. The affected age group was 18-22 years. Chlorine tablets were distributed to the households. 1 stool sample collected and sent to NIV Alapuzha showed presence of Rota virus. 6 water samples collected showed presence of coliforms. Superchlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.

KL/WAY/2026/6/187	Kerala	Wayanad	Suspected Food Poisoning	23	0	02-02-2026	03-02-2026	Under Surveillance	Cases of loose motion and vomiting were reported from Village Vengappally, Sub-District Vythiri, District Wayanad. District RRT investigated the outbreak. Cases had consumed food at St. Antony's Church Madakunnu Festival. All cases were treated at FHC Vengapally and FHC Kottathara. The affected age group was 8-69 years. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
MP/SHI/2026/6/188	Madhya Pradesh	Shivpuri	Measles	5	0	09-01-2026	02-02-2026	Under Surveillance	Cases of fever with maculo-papular rash were reported from Village Mungawali, Sub-District Karera, District Shivpuri. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated at CHC Karera. Cases were in the age group 3-7 years. Out of 5 blood samples collected, 4 samples tested positive for Measles (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MP/SIN/2026/6/189	Madhya Pradesh	Singrauli	Chickenpox	9	0	04-02-2026	05-02-2026	Under Surveillance	Cases of fever with rash were reported from Village Makrohar, Sub-District and District Singrauli. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated at PHC Mada. Cases were in the age

									group 6 months - 27 years. 3 blood samples collected, tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MP/UJJ/2026/6/190	Madhya Pradesh	Ujjain	Chickenpox	21	0	03-02-2026	05-02-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Seva Dham Ambodia Ashram, Sub-District Ghatiya, District Ujjain. District RRT investigated the outbreak. Active search for fever cases was done in the affected area. Cases were clustered in a close residential setting. The ashram housed mentally ill and elderly persons, increasing the risk of rapid transmission. Symptomatic treatment was given to cases. Ashram authorities were advised to ensure 7 days of isolation of all cases to prevent further spread of the disease. The affected age group was 8-27 years. Out of 20 blood samples collected, 16 samples tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MH/NAN/2026/6/191	Maharashtra	Nanded	Hepatitis A	12	0	03-02-2026	03-02-2026	Under Surveillance	Cases of nausea, abdominal pain, dark colored urine and fever were reported from Village Islapur, Sub-District Kinwat, District Nanded. District RRT investigated the outbreak. House to house survey was

									done. Cases were from Eklavya Modern residential school and Watoni Modern residential school. Probable source of the outbreak was contaminated drinking water. A medical camp was established in the locality. All cases were treated. Chlorination of water sources was done. Out of 20 serum samples collected and sent to GMC Nanded, 13 samples tested positive for Hepatitis A (IgM ELISA). 3 water samples collected, were non-potable. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
MG/EAS/2026/6/192	Meghalaya	East Khasi Hills	Acute Gastroenteritis	20	0	03-02-2026	06-02-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Umnihtmar, Sub-District Pynursla, District East Khasi Hills. District RRT investigated the outbreak. Cases were treated at PHC Wahsherkhmut. The affected age group was 10 months to 34 years. 2 stool samples were collected and sent to ICMR–RMRC, Dibrugarh, where Norovirus Genogroup II (GII) was detected in both samples. Chlorine tablets were distributed to the households. ORS packets were given to cases. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

OR/JAG/2026/6/193	Odisha	Jagatsinghapur	Chickenpox	38	0	03-02-2026	03-02-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Chaulia, Sub-District Ersama, District Jagatsinghapur. District RRT investigated the outbreak. Active search for fever cases was done. All cases were treated symptomatically. Cases were in the age group 5-14 years. Out of 7 blood samples collected and sent to ICMR-RMRC Bhubaneswar, 2 found positive for <i>Varicella zoster</i> by VZV PCR (Skin lesions or scabs). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
OR/KHO/2026/6/194	Odisha	Khordha	Hepatitis A	89	0	06-02-2026	06-02-2026	Under Control	Cases of fever with yellowish discoloration of sclera were reported from Prativa devi Nursing college girls' hostel, Ward no-14, Sub-District and District Khordha. Block and District RRT investigated the outbreak. The most affected age group was 5-14 years. 20 blood samples and 5 water samples were collected and sent to DPHL Khordha for testing. Blood samples were tested for HAV and HEV. Water samples were tested for H ₂ S and OT. Water samples revealed OT<0.01 PPM and H ₂ S Positive. 5 Blood samples were HAV positive (IgM ELISA). Community awareness and health education given by the peripheral team on safe drinking water, food habits, hygiene and sanitation.

OR/RAY/2026/6/195	Odisha	Rayagada	Shigellosis	81	1	31-01-2026	02-02-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Bariguda, Sub-District Bishamakatak, District Rayagada. District RRT investigated the outbreak. Cases were students of Nalinee Vidyamandir (girl's residential school) Bariguda, B. Cuttack. All cases were treated at CHC Bissam Cuttack. Cases were in the age group 5-14 years. Out of 26 rectal swab samples collected, 15 samples tested positive for <i>E.coli</i> and 5 samples were positive for shigella species. Out of 7 water samples collected and sent to DPHL, Rayagada, 4 samples were positive for <i>E.Coli</i> . 1 death was reported in a 9-year-old female, who died on 31.01.2026. Over-head tanks were cleaned and chlorination of water sources was done in the school premises. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
OR/SAM/2026/6/196	Odisha	Sambalpur	Acute Diarrhoeal Disease	34	0	04-02-2026	04-02-2026	Under Surveillance	Cases of loose watery stools were reported from Newton College, Village Debeipali, Sub-District Sasan, District Sambalpur. District RRT investigated the outbreak. Total students in the college were 702. Cases were treated at CHC Debeipali. Cases were in the age group 15-44 years. 3 rectal swab samples collected, tested negative for cholera by culture. Out of 7 water samples collected and sent to DPHL Sambalpur, 1 sample showed

									presence of <i>E. coli</i> . Over-head tanks were cleaned. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
OR/SON/2026/6/197	Odisha	Sonepur	Fever with Rash	6	0	02-02-2026	03-02-2026	Under Surveillance	Cases of fever with rash were reported from Village Khuliakani, Sub-District Ulunda, District Sonepur. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were given symptomatic treatment. All cases recovered. Cases were in the age group 5-14 years. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
TN/ARI/2026/6/198	Tamil Nadu	Ariyalur	Suspected Food Poisoning	40	0	04-02-2026	04-02-2026	Under Control	Cases of loose motion, vomiting and abdominal pain were reported from Village T. Pottakollai, Sub-District Udayarpalayam, District Ariyalur. District RRT investigated the outbreak. Cases fell ill after consuming food in a local festival (Amman koil). All cases were given symptomatic treatment at a health camp established in the locality. ORS packets were given to cases. The affected age group was 7-80 years. 5 stool samples and 5 water samples were tested at DPHL, Jayankondam, Ariyalur. Culture test was conducted on the stool samples and coliform test for the water samples. 1 Water sample showed the presence of coliform

									bacteria. No growth of <i>V. cholerae</i> , <i>Salmonella species</i> and <i>Shigella species</i> were found in the stool samples. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
TN/TEN/2026/6/199	Tamil Nadu	Tenkasi	Chikungunya	12	0	01-02-2026	02-02-2026	Under Control	Cases of fever with joint pain were reported from Village Thalai Subramaniyapuram, Sub-District Alangulam, District Tenkasi. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Maruthamputhoo. Out of 12 blood samples collected and sent to DPHL Tenkasi, 2 samples tested positive for Chikungunya (IgM ELISA). The affected age group was 13-65 years. Anti-larval activities and fogging was done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
TN/THA/2026/6/200	Tamil Nadu	Thanjavur	Chickenpox	17	0	05-02-2026	06-02-2026	Under Surveillance	Cases of fever with rash were reported from Primary School Uthamadhani, Village Uthamadani, Sub-District Kumbakonam, District Thanjavur. District RRT investigated the outbreak. Active search for fever cases was done in the affected area. Cases were treated symptomatically. The affected age group was 5-70 years. 5 serum samples, 5 throat swab samples, and 3 water samples were collected and tested at King Institute, Guindy, and DPHL, Kumbakonam. Laboratory investigations included IgM ELISA, PCR, and coliform

									testing. No positive findings were reported. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
UP/JAU/2026/6/201	Uttar Pradesh	Jaunpur	Measles	5	0	10-01-2026	05-02-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Shamshuddinpur, Sub-District Shahganj, District Jaunpur. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. All 5 blood samples collected and sent to VRDL, SGPGIMS, Lucknow, tested positive for Measles (IgM ELISA). Cases were in the age group 6 months -11 years. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
WB/BIR/2026/6/202	West Bengal	Birbhum	Acute Diarrhoeal Disease	33	0	02-02-2026	03-02-2026	Under Control	Cases of loose motion were reported from Village Shingdohari, Sub-District Nalhati - I, District Birbhum. District and Block RRT investigated the outbreak. The affected age group was 13-65 years. The cases were treated at Nalhati Rural Hospital. 1 rectal swab sample collected and sent to RGMCH, Birbhum showed no pathogenic organism grown in culture. Medicines and ORS packets were distributed to affected individuals. The probable cause of the outbreak was contaminated drinking water supplied through water supply pipeline. Pipeline leakages were

									repaired by PHED. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
