District wise disease alerts/outbreaks reported in the 48th week 2025

48th Week Map

Unique ID.	Name of State-UT	Name of District	Disease-Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments- Action Taken
AP/SRI/2025/48/2121	Andhra Pradesh	Sri Sathya Sai	Suspected Food Poisoning	27	0	26-11-2025	26-11-2025	Under Control	Cases of vomiting and loose motion were reported from Village Bathina Palli, Sub-District Obuladevaracheruvu, District Sri Sathya Sai. District RRT investigated the outbreak. The affected age group was 3-75 years. All the affected people had consumed food prepared from expired semiya and oil at a function. 2 stool samples were tested at DH Hindupur, and no pathogenic organism could be isolated from them. 6 water samples tested by MLHP were found to be safe for drinking. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
BH/PUR/2025/48/2122	Bihar	Purbi Champaran	Measles	8	0	28-11-2025	28-11-2025	Under Surveillance	Cases of fever with rash were reported from Village Laxmipur Ward No 13, Sub-District Turkaulia, District Purbi Champaran. District RRT investigated the outbreak. The affected age group was 2-9 years. Out of 8 blood samples collected and sent to AIIMS Patna, 4 samples tested positive for Measles (IgM ELISA). Medicines and Vitamin A Solution were provided. Community awareness and health education given by the peripheral team on vaccination, isolation of cases, spread of infection, hygiene and sanitation.
CT/BAL/2025/48/2123	Chhattisgarh	Balod	Hepatitis A	34	0	24-11-2025	29-11-2025	Under Control	Cases of fever, vomiting and dark urine were reported from Village Kamraud, Sub-District Arjunda, District Balod.

									District RRT investigated the outbreak. The affected age group was 9-60 years. A health camp was organized in the village and a door-to-door survey was conducted. 21 blood samples were tested at AIIMS Raipur and 7 were found to be positive for Hepatitis A virus (IgM ELISA). The PHE Department collected 16 water samples and all were found to be safe for drinking. Distribution of ORS Packets, zinc tablets and chlorines tablets were done. Community awareness and health education given by the peripheral team on consumption of boiled water and safe food habits, hygiene and sanitation.
CT/BAL/2025/48/2124	Chhattisgarh	Balod	Cholera	32	0	22-11-2025	26-11-2025	Under Surveillance	Cases of loose motion and stomach ache were reported from Village Mujgahan, Sub-District Gurur, District Balod. District RRT investigated the outbreak. The affected age group was 3-64 years. A health camp was organized in the village and a door-to-door survey was conducted. 4 stool samples were tested at DH Balod and 3 were found to be positive for Cholera by culture. The PHE Department took 5 water samples and all were found to be safe for drinking. Distribution of ORS Packets, zinc tablets and chlorines tablets were done. Health education was given in the village to consume boiled water. Community awareness and health education given by the peripheral team on consumption of boiled water and safe food habits, hygiene and sanitation.

GJ/CHH/2025/48/2125	Gujarat	Chhotaudepur	Acute Gastroenteritis	25	0	25-11-2025	28-11-2025	Under Control	Cases of fever, abdominal pain and vomiting were reported from Navodaya Vidyalaya Village Bahadarpur, Sub-District Sankheda, District Chhotaudepur. District RRT investigated the outbreak. The most affected age group was 11-17 years. The medical team from PHC Bahadarpur reached the site and gave treatment on the spot. School administration was advised to maintain hygiene in the hostel kitchen and undertake routine chlorination of water sources. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
GJ/SUR/2025/48/2126	Gujarat	Surat	Acute Diarrhoeal Disease	10	0	27-11-2025	28-11-2025	Under Surveillance	Cases of loose motion were reported from Anand Nagar, Village Fulpada, Sub-District Puna, District Surat. District RRT investigated the outbreak. The affected age group was 1-60 years. All cases were treated symptomatically. Alternate water supply through tankers was arranged in the affected area. Out of 41 water samples collected and sent to PHL Vesu, Surat, 3 samples were non-potable. ORS packets and chlorine tablets were distributed. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JK/KUP/2025/48/2127	Jammu and Kashmir	Kupwara	Suspected Food Poisoning	12	0	24-11-2025	25-11-2025	Under Surveillance	Cases of stomach ache and vomiting were reported from Village Nowgam, Sub-District Langate, District Kupwara. District RRT investigated the outbreak. The affected age group was 10-70 years. The cases were treated at

									GMC Handwra. The affected family members had consumed food (forest derived vegetables) prepared at home. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JH/CHA/2025/48/2128	Jharkhand	Chatra	Suspected Food Poisoning	10	0	23-01-2025	25-11-2025	Under Surveillance	Cases of loose motion, abdominal pain and vomiting were reported from Village Pakariya, Sub-District Chatra Sadar, District Chatra. District RRT investigated the outbreak. Cases were children aged 10-18 years who fell ill after consuming food (bread) served in meal. All cases were treated at Chatra Sadar Hospital. Community awareness and health education given by the peripheral team on safe food habits, hygiene and sanitation.
JH/GIR/2025/48/2129	Jharkhand	Giridih	Chickenpox	6	0	22-11-2025	24-11-2025	Under Surveillance	Cases of fever with rash were reported from Village: Gandey, Sub-District Gande, District Giridih. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were students of Kasturba Vidyalaya, Gandey. The affected age group was 11-17 years. Out of 40 blood samples collected, 6 samples tested positive for <i>V. zoster</i> (IgM ELISA). All cases were given symptomatic treatment. Parents and school administration were advised for isolation of cases, hygiene maintenance and proper nutrition.
JH/WES/2025/48/2130	Jharkhand	West Singhbhum	Malaria	10	0	29-11-2025	29-11-2025	Under Surveillance	Cases of fever with chills were reported from Villages Uparlota, Tilaisud, Barkela, Kabragutu, Keadchalam and

									Dopai, Sub-District Khuntpani, District West Singhbhum. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated with anti-malarial medicines. Both children and adults were affected. All 10 blood samples collected tested positive for <i>P. falciparum</i> (MPBS). Fogging was done in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KN/BEN/2025/48/2131	Karnataka	Bengaluru Urban	Acute Diarrhoeal Disease	26	0	27-11-2025	29-11-2025	Under Surveillance	Cases of loose motion and vomiting were reported from Prestige Falcone City Apartment, GBA South area, Sub-District Bengaluru South, District Bengaluru Urban. District RRT investigated the outbreak. Cases were treated at a health camp established in the locality. ORS packets were given to cases. Most cases were in the age group of 15-59 years. 34 Water samples from each residential block and 12 stool samples (for culture) were collected and tested at the PHI for analysis. All water samples tested negative for <i>Vibrio cholerae</i> and 5 water samples were not suitable for potable purpose. The stool samples showed no positive findings. Chlorination of water sources was done. Water supply pipelines were inspected for leakages. Community awareness and health education given

									by the peripheral team on safe drinking water, hygiene and sanitation.
KL/ERN/2025/48/2132	Kerala	Ernakulam	Mumps	6	0	28-11-2025	28-11-2025	Under Surveillance	Cases were reported from students of St. Joseph LP School, Paingotur, Sub-District Kothamangalam, District Ernakulam. Cases presented with swelling in the jaws and general weakness. District RRT investigated the outbreak. The affected age group was 6-8 years. All cases were symptomatically treated at different hospitals. 2 children were vaccinated with MMR and 4 children were vaccinated with MR vaccine. Community awareness and health education given by the peripheral team on isolation of cases, spread of infection and immunization, hygiene and sanitation.
KL/ERN/2025/48/2133	Kerala	Ernakulam	Hand Foot and Mouth Disease	10	0	28-11-2025	28-11-2025	Under Control	Cases were reported from Bhavans School, Eroor Ward 45 of Thrippunithura Municipality, Sub-District Kanayannur, District Ernakulam. District RRT investigated the outbreak. The students were 6-year-olds with symptoms of fever, sore throat, and a rash or blisters on the hands, feet, and in the mouth. The children were symptomatically treated. Infected students were under isolation at home. Community awareness and health education given by the peripheral team on isolation of cases, spread of infection and immunisation, hygiene and sanitation.

KL/ERN/2025/48/2134	Kerala	Ernakulam	Hepatitis A	9	0	28-11-2025	28-11-2025	Under Surveillance	Cases of fever, dark urine, and loss of appetite were reported from a men's hostel in Division 24 Thrikkakara Municipality, Sub-District Kanayannur, District Ernakulam. District RRT investigated the outbreak. The affected age group was 22-27 years. Cases were treated at health facilities. Well was the source of drinking water. 1 blood sample collected, tested positive for Hepatitis A (IgM ELISA). 2 water samples tested at RPH Lab and no coliforms were detected. Super chlorination of the well was done in the affected area. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/ERN/2025/48/2135	Kerala	Ernakulam	Chickenpox	13	0	28-11-2025	28-11-2025	Under Surveillance	Cases of fever with rash were reported from Snheha sadhan care center, Village Keerampara (ward 11), Sub-District Kothamangalam, District Ernakulam. District RRT investigated the outbreak. Cases were treated symptomatically. The affected age group was 15-60 years. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
KL/IDU/2025/48/2136	Kerala	Idukki	Suspected Food Poisoning	73	0	25-11-2025	26-11-2025	Under Control	Cases of loose stools, vomiting and abdominal pain were reported from St. Sebastian School, Nedumkandam, Sub-District Udumbanchola, District Idukki. District RRT investigated the outbreak. Both children and adults were affected. Students who visited

									Kodekkanal on a school trip were affected after consuming food from hotels. Out of 192 students and staff, 73 were affected. Symptomatic treatment was given to cases. 36 cases were treated at health facilities. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/KAS/2025/48/2137	Kerala	Kasaragod	Suspected Food Poisoning	83	0	23-11-2025	24-11-2025	Under Surveillance	Cases were reported among students and teachers of GHSS Kakkat, District Kasaragod following a school trip. District RRT investigated the outbreak. The affected age group was 10-52 years. 4 stool samples were collected and sent to NIV Alappuzha for Gastropanelling and bacteriological culture test and results were negative. Cases were given symptomatic treatment. All cases recovered. ORS packets were given to cases. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/KOT/2025/48/2138	Kerala	Kottayam	Suspected Food Poisoning	15	0	27-11-2025	28-11-2025	Under Surveillance	Cases of abdominal pain, loose stools, and vomiting were reported from St. Berchmans College, Ward 4 of Changanasserry Municipality, Sub-District Changanassery, District Kottayam. District RRT investigated the outbreak. Affected cases were in the age group of 18-35 years. The affected students reported that they had consumed food from the college canteen. 2 Water samples were tested at Water Authority Lab Changanassery

									showed no positive findings. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/KOT/2025/48/2139	Kerala	Kottayam	Chickenpox	8	0	24-11-2025	27-11-2025	Under Surveillance	Cases of fever with vesicular rashes over the body were reported from Kendriya Vidyalaya Village Velloor, Sub-District Vaikom, District Kottayam. District RRT investigated the outbreak. Active search for fever cases was done in the affected area. The affected age group was 10-11 years. Symptomatic treatment was given to cases. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
KL/KOT/2025/48/2140	Kerala	Kottayam	Dengue	13	0	21-11-2025	26-11-2025	Under Surveillance	Cases of fever, body pain, muscle pain, headache and joint pain were reported from ward 34 (YMCA) of Changanassery Municipality, Sub-District Changanassery, District Kottayam. District RRT investigated the outbreak. The affected individuals were in the age category of 21 to 70 years. All 13 blood samples collected and sent to GH Changanaseery, tested positive for Dengue (NS1 Ag Card test). Epidemiological assessment revealed that the outbreak is strongly linked to the construction site activity occurring in Ward 34, where significant water stagnation was observed. Fever surveys, fogging and ISS spraying were conducted. Community awareness and

									health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/KOZ/2025/48/2141	Kerala	Kozhikode	Hepatitis A	46	0	26-11-2025	26-11-2025	Under Surveillance	Cases of fever, nausea and fatigue were reported from Village Purameri (ward 8), Block Kuttiady, Sub-District Vatakara, District Kozhikode. District RRT investigated the outbreak. The affected individuals developed symptoms after attending an engagement ceremony. All 6 blood samples collected and tested at RPHL Kozhikode lab, were positive for Hepatitis A virus (IgM ELISA). 1 water sample tested at Kerala Water Authority Lab Kutyadi, showed the presence of Coliforms. A medical camp was established. Cases were treated. Super-chlorination of the well was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/KOZ/2025/48/2142	Kerala	Kozhikode	Mpox	2 (Clade I)	0	22-11-2025	24-11-2025	Under Surveillance	A 27-year-old male working at RIG, Abu Dhabi, United Arab Emirates, returned to Kozhikode on 12.11.2025. He presented with complaints of multiple pustular lesions over the genitalia and pubic region on 16.11.2025; followed by fever which started on 18.11.2025. Initially, he consulted in a private clinic at Kakkodi on 18.11.2025 and again on 20.11.2025. From there he was referred to MCH KKD for further management and consulted at the MCH Dermatology department on 21.11.2025. Samples (Lesion swab, TS, Swab from crust, urine) were collected. First sample of

							<p>the patient tested positive for Mpox by RTPCR on 22.11.2025 at MCH KKD. The second sample tested positive for Mpox (Clade I) on 26.11.2025 at NIV Pune. Subsequently, third, fourth and fifth sample collected on 29.11.2025, 08.12.2025 and 12.12.2025 tested positive for Mpox (RTPCR) at NIV Pune. The patient tested negative for Mpox on 19.12.2025 at NIV Pune.</p> <p>The second case, a 27-year-old female, primary contact of the first case, presented with fever, sore throat and lymph node enlargement which started on 25.11.2025. The patient consulted at MCH KKD on 26.11.2025 where medicines were given. Due to persistent throat pain and a single papule over right ring finger palmar aspect, she again consulted at MCH KKD on 28.11.2025 and her samples were taken for testing. The patient tested positive for Mpox (Clade I) at NIV Pune on 29.11.2025. She was advised home isolation. Subsequently, samples collected on 03.12.2025, 12.12.2025 and 19.12.2025 tested positive for Mpox (RTPCR) at NIV Pune. The patient tested negative for Mpox on 27.12.2025 at NIV Pune. Both the patients recovered. Contacts were traced and isolated for 21 days. Fever survey was done. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.</p>

KL/PAL/2025/48/2143	Kerala	Palakkad	Hepatitis A	22	0	25-11-2025	26-11-2025	Under Surveillance	Cases of loss of appetite, nausea and dark coloured urine were reported from Village Karimba II, Sub-District Mannarkad, District Palakkad. District RRT investigated the outbreak. House to house survey was done. The main source of water was a well in the locality. Cases were treated at PHC Kalladicode. Cases were in the age group 5-35 years. Out of 10 blood samples tested at IPHL PKD, 10 samples tested positive for Hepatitis A (IgM ELISA). Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
KL/PAL/2025/48/2144	Kerala	Palakkad	Mumps	48	0	25-11-2025	26-11-2025	Under Surveillance	Cases of fever with parotid gland swelling were reported from GUPS School, Village Elavanchery, Sub-District Chittur, District Palakkad. District RRT investigated the outbreak. House to house fever survey was done. Most of the affected cases were students of pre-primary to 2nd standard. All cases were treated symptomatically. The affected age group was 2-12 years. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
KL/WAY/2025/48/2145	Kerala	Wayanad	Chickenpox	20	0	27-11-2025	28-11-2025	Under Surveillance	Cases of fever with rash were reported from Village Anchukun, Sub-District Mananthavady, District Wayanad. District RRT investigated the outbreak.

									Cases were residing at premetric hostel Anjukunnu. Symptomatic treatment was given to cases. The affected age group was 7-27 years. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MP/JAB/2025/48/2146	Madhya Pradesh	Jabalpur	Acute Diarrhoeal Disease	60	0	29-11-2025	29-11-2025	Under Surveillance	Cases of loose watery stools, fever and vomiting were reported from Village Nigari, Block Bargi, Sub-District/District Jabalpur. District RRT investigated the outbreak. House to house survey was done. A medical camp was established in the locality. All cases were given anti-diarrheal medicines and ORS packets. The affected age group was 6-65 years. 5 stool samples were tested at Microbiology Department, Medical College Jabalpur and no positive findings were reported. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
MP/SEH/2025/48/2147	Madhya Pradesh	Sehore	Chikungunya	10	0	24-11-2025	25-11-2025	Under Control	Cases of fever with joint pain were reported from Village Nimnagaon, Sub-District Nasrullaganj, District Sehore. Block RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Baibori. The affected age group was 20-80 years. 10 serum samples were tested at DH Sehore. 4 samples tested positive for Chikungunya (IgM ELISA). Anti-larval activities and fogging was done in the affected area. Community awareness and health

									education given by the peripheral team on vector control measures, hygiene and sanitation.
MH/GAD/2025/48/2148	Maharashtra	Gadchiroli	Hepatitis A	40	0	27-11-2025	27-11-2025	Under Surveillance	Cases of nausea, abdominal pain, fever and dark coloured urine were reported from Village Gadaheri, Sub-District Aheri, District Gadchiroli. District RRT investigated the outbreak. House to house survey was done. Pipeline leakages were observed with mixing of sewage water and supply water. Cases were treated at a health camp established in the locality. Both children and adults were affected. Out of 7 blood samples collected and sent to DPHL Gadchiroli, 2 samples tested positive for Hepatitis A (IgM ELISA). All 8 water samples collected were potable. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
MH/NAN/2025/48/2149	Maharashtra	Nanded	Cholera	10	0	28-11-2025	30-11-2025	Under Surveillance	Cases of loose motion and vomiting were reported from Hyderbagh Ward, Millat Nagar, Galli No. 13, Sub-District/District Nanded. District RRT investigated the outbreak. Medicine and ORS packets were given to cases. The affected age group was 5-45 years. Out of 4 stool samples collected and sent to GMC Nanded, 2 samples tested positive for cholera by culture. Chlorination of water sources in nearby houses was done. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.

MH/RAI/2025/48/2150	Maharashtra	Raigad	Fever	17	1	25-11-2025	26-11-2025	Under Surveillance	Cases of fever with myalgia and fatigue were reported from Village Kalsuri, Sub-District Mhasla, District Raigad. District RRT investigated the outbreak. Active search for fever cases was done in the affected area. Cases were treated at PHC Mendadi. Cases of all age groups were affected. All 12 blood samples collected and sent to DH Alibag, tested negative for Dengue (NS1 ELISA). 1 death was reported of a 54 years-old-male on 17.11.2025 with symptoms of chest pain, weakness, fever and headache. Anti-larval activities and fogging was done. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
MG/EAS/2025/48/2151	Meghalaya	East Jaintia Hills	Acute Diarrhoeal Disease	65	0	26-11-2025	26-11-2025	Under Control	Cases of loose stools (>3 times a day) were reported from JNV School, Village Rymbai, Sub-District Khliehriat, District East Jaintia Hills. District RRT investigated the outbreak. Symptomatic treatment was given to cases. ORS packets were given to cases. Chlorine tablets were distributed to the households. Cases were mostly in the age group 5-14 years. 58 cases were screened, and blood samples were sent to the Pasteur Institute for testing, of which 28 tested positive for H. pylori. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
NL/LON/2025/48/2152	Nagaland	Longleng	Fever	21	0	24-11-2025	24-11-2025	Under Surveillance	Cases of fever with chills were reported from Village Netnyu, Sub-District Tamlu, District Longleng. District RRT

									investigated the outbreak. House to house fever survey was done. Cases were treated with anti-malarial medicines. Out of 21 blood samples collected, 1 sample tested positive for <i>P. vivax</i> (RDT). Adults were affected. Fogging was done in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
OR/BOU/2025/48/2153	Odisha	Boudh	Acute Gastroenteritis	7	1	26-11-2025	27-11-2025	Under Surveillance	Cases of stomach ache, vomiting and loose motion were reported from Bapujinagar, Ward No-16, NAC, Boudh, Sub-District Boudh Sadar, District Boudh. Block and district RRT investigated the outbreak. The affected age group was 15-44 years. 2 water samples (from dug well and tube well) and 3 rectal swabs were tested at DPHL Boudh. The water samples tested positive for H ₂ S and OT<0.01 PPM. Culture test for rectal swabs showed no enteropathogenic organisms. The patients were treated at VIMSAR Burla, Sambalpur District. A 34-year-old male died with the symptoms abdominal pain, vomiting, loose motion, weakness and discomfort on Date 26.11.2025. House to house survey was conducted and water disinfection was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

TN/ARI/2025/48/2154	Tamil Nadu	Ariyalur	Fever	11	0	28-11-2025	28-11-2025	Under Control	Cases of fever were reported from Village Keelapalur, Sub-District Ariyalur, District Ariyalur. District RRT investigated the outbreak. Active search for fever cases was done in the affected area. Cases were treated at PHC Keelapalur. The affected age group was 1-63 years. 1 blood sample collected, tested positive for <i>O. tsutsugamushi</i> (IgM ELISA) in Ariyalur Medical College. Further, 4 blood samples and 3 water samples tested at DPHL, Vilangudi, Ariyalur showed no positive findings. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
TN/ERO/2025/48/2155	Tamil Nadu	Erode	Chickenpox	9	0	24-11-2025	25-11-2025	Under Surveillance	Cases of fever with rash were reported from Village Kuttaimedu, Sub-District Bhavani, District Erode. District RRT investigated the outbreak. House to house survey was done. Cases were students of primary school. All cases were treated symptomatically. The most affected age group was 6-10 years. 5 serum samples were tested at Kings Institute, Guindy, Chennai and all tested positive for <i>V. zoster</i> (IgM ELISA). The school administration was advised to isolate symptomatic cases for 7 days at home. Community awareness and health education given by the peripheral team on proper hydration of cases, hygiene and sanitation.

DISEASE OUTBREAKS OF PREVIOUS WEEKS REPORTED LATE

Unique ID.	Name of State-UT	Name of District	Disease-Illness	No. of Cases	No. of Deaths	Date of Start Outbreak	Current Status	Comments- Action Taken
KL/KOL/2025/48/2156	Kerala	Kollam	Mumps	301	0	18-11-2025	Under Surveillance	A cluster of cases with fever and parotid gland swelling were reported from Shasthamkotta and Poruvazhy Panchayats, Blocks Sooranadu (137 cases) and Mynagapally (176 cases), Sub-District Kunnathur, District Kollam. District RRT investigated the outbreak. Cases gradually increased in October–November. The index case was a 6-year-old male from Poruvazhy Panchayat who self-isolated for 15 days. Children aged 5–6 years were most affected, and cases also occurred in adults. The outbreak spread rapidly through school buses, where children from different panchayats were in close, poorly ventilated contact, facilitating transmission. Inter-school attendance and household contacts further amplified spread, making containment challenging. Cases were treated symptomatically at health facilities and isolated at home. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

KL/MAL/2025/48/2157	Kerala	Malappuram	Hepatitis A	33	0	18-11-2025	Under Surveillance	Cases of nausea, abdominal pain, loss of appetite and dark coloured urine were reported from Valanchery Municipality – Division 6, Sub-District Tirur, District Malappuram. District RRT investigated the outbreak. Cases were students of VHSS Valanchery and stayed at the school hostel. Cases frequently consumed food at nearby hotels. All cases were treated at PHC Valanchery. Cases were students of Higher Secondary and High School. 1 water sample collected from an open well (water source of the school) was potable. The affected age group was 13 to 17 years. 2 blood samples tested at RPHL Malappuram lab, were positive for Hepatitis A (IgM ELISA). Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
MH/THA/2025/48/2158	Maharashtra	Thane	Dengue	10	0	01-11-2025	Under Control	Cases of fever were reported from Village Uchale, Sub-District: Murbad, District Thane. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Narivali. Cases were in the age group 27-68 years. Out of 10 serum samples collected and sent to Civil Hospital Thane, 6 samples tested positive for Dengue (1 sample - NS1 ELISA and 5 samples - Rapid NS1). Fogging was done in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
