CT/JAN/2025/47/2085	Chhattisgarh	Janjgir Champa	Acute Diarrhoeal Disease	35	0	23-11-2025	23-11-2025	Under Surveillance	Cases of loose stool and vomiting were reported from Village Bargawan, Sub-District Akaltara, District Janjgir Champa. District RRT investigated the outbreak. The affected age group was 2-69 years. 3 stool samples were collected and sent to the District Hospital Laboratory, Janjgir, for microscopy (hanging

									drop preparation), and all samples tested negative. Medicines and ORS packets were given to cases. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
CT/KAN/2025/47/2086	Chhattisgarh	Kanker	Chickenpox	22	0	21-11-2025	21-11-2025	Under Surveillance	Cases of fever with rashes were reported from Village Durgkondal, Sub-District Durgukondal, District Kanker. District RRT investigated the outbreak. The affected age group was 11-13 years. Blood samples of 5 cases were sent to Govt. Medical College Jagdalpur. 4 tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education given by the peripheral team on spread of infection, isolation of cases, hygiene and sanitation.

CT/RAI/2025/47/2087	Chhattisgarh	Raipur	Suspected Typhoid	16	0	18-11-2025	22-11-2025	Under Surveillance	Cases of fever and loss of appetite were reported from Urban area/Sub District Abhanpur, District Raipur. District RRT investigated the outbreak. The affected age group was 7-70 years. The cases were treated symptomatically. All 16 serum samples collected and sent to UCHC Abhanpur, tested positive for <i>S. typhi</i> by widal test. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
GJ/RAJ/2025/47/2088	Gujarat	Rajkot	Chandipura Virus	1	0	18-11-2025	18-11-2025	Under Surveillance	Case was reported from Bhagwatipara area of Rajkot city, Sub-District Rajkot East, District Rajkot. A 5-years-old female child developed symptoms of hoarseness of voice with headache on 05-11-2025 and was admitted to PDU Hospital

									on the same day. On 12-11-2025 the patient developed neurological symptoms. Blood and CSF sample was collected on 13-11-2025 and sent to GBRC Ahmedabad for Chandipura virus confirmation. The patient tested positive on 17-11-2025. The patient was discharged on 8/12/2025 in stable condition. District RRT investigated the outbreak. Active case search in the affected area was done. No new case was identified. Peripheral health teams focussed on reducing breeding sites and vector control measures, hygiene and sanitation.
HR/PAN/2025/47/2089	Haryana	Panipat	Suspected Food Poisoning	13	0	18-11-2025	20-11-2025	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Kasturba Gandhi Girls Hostel, Village Jalmana, CHC Bapoli, District Panipat. District RRT investigated the outbreak. Cases developed

									symptoms after eating porridge in the hostel mess. All cases were treated symptomatically. The affected age group was 11-13 years. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JK/KUL/2025/47/2090	Jammu and Kashmir	Kulgam	Hepatitis A	18	0	20-11-2025	21-11-2025	Under Surveillance	Cases of loss of appetite, nausea and abdominal pain were reported from Village Churath, Sub-District/District Kulgam. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Devsar. The affected age group was 4-62 years. Out of 17 serum samples collected and sent to DPHL Anantnag, 8 samples tested positive for Hepatitis A (IgM ELISA). Out of 4 water samples collected and sent to DPHL Kulgam, 1 sample was unfit for

									drinking purpose. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JK/SRI/2025/47/2091	Jammu and Kashmir	Srinagar	Hepatitis A	12	0	19-11-2025	19-11-2025	Under Surveillance	Cases of nausea and loss of appetite were reported from Village Challponkocha, Sub-District Srinagar (North), District Srinagar. District RRT investigated the outbreak. House to house survey was done. Cases were treated at UPHC S R Gunj. The affected age group was 12- 32 years. Out of 7 blood samples collected and sent to DPHL JLNH Hospital Rainawari, 3 samples tested positive for Hepatitis A (IgM ELISA). All 3 water samples collected were non-potable. Chlorination of water sources was done. Community awareness

									and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JH/EAS/2025/47/2092	Jharkhand	East Singhbhum	Malaria	58	0	20-11-2025	21-11-2025	Under Surveillance	Cases of fever with chills were reported from Village Koira, Sub-District Boram, District East Singhbhum. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated with anti-malarial medicines. Out of 58 blood samples collected, 32 samples tested positive for Malaria (RDT). Both children and adults were affected. Fogging was done in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
JH/WES/2025/47/2093	Jharkhand	West Singhbhum	Malaria	13	0	22-11-2025	23-11-2025	Under Surveillance	Cases of fever with chills were reported from Villages Sonua, Kudaburu, Baljori,

									<p>Kharimati, Golmunda, Badaikocha and Behrabindha, Sub-District Sonua, District West Singhbhum. District RRT investigated the outbreak. Active search for fever cases was done in the locality. Cases were treated. Cases were in the age group 18-39 years. All 13 blood samples collected, tested positive for Malaria by MPBS. Fogging was done in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.</p>
JH/WES/2025/47/2094	Jharkhand	West Singhbhum	Malaria	10	0	17-11-2025	17-11-2025	Under Surveillance	<p>Cases of fever with chills were reported from Village Tiyaosi, Serbinja, Kharbandh, Kulaoa, Haldi Pokhar and Ushambir, Sub-District Kumardungi, District West Singhbhum. District RRT investigated the outbreak. House to house fever survey was done.</p>

									Cases were treated. Both children and adults were affected. All 10 blood samples collected, tested positive for Malaria by MPBS. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KN/HAV/2025/47/2095	Karnataka	Haveri	Acute Diarrhoeal Disease	23	0	18-11-2025	18-11-2025	Under Control	Cases of loose stools, abdominal pain and vomiting were reported from Village Mallanaikankoppa, Sub-District Shiggaon, District Haveri. District RRT investigated the outbreak. Both children and adults were affected. Cases were treated at PHC Chandapur. House-to-house survey was undertaken by ASHA workers for active case finding. 2 water samples, 1 stool sample and 3 blood samples were collected and sent to the DPHL Haveri. Laboratory findings showed water

									<p>samples to be unfit for human consumption with growth of <i>E.coli</i>, while the stool sample was negative for hanging drop, ova and cysts and showed no enteric pathogen on culture, and all 3 blood cultures were sterile after 7 days of aerobic incubation. The outbreak was attributed to contamination of drinking water sources. An emergency clinic was established in the village with adequate availability of medicines, fluids and ORS, and people were advised to consume boiled water. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.</p>
KL/ERN/2025/47/2096	Kerala	Ernakulam	Mumps	12	0	20-11-2025	20-11-2025	Under Surveillance	<p>Cases of fever with parotid gland swelling were reported from Anganwadi Center, Ward</p>

									10, Arakuzha Panchayat, Sub-District Muvattupuzha, District Ernakulam. District RRT investigated the outbreak. Cases were treated at CHC Pandappilly. Cases were in the age group 3-5 years. Community awareness and health education given by the peripheral team on isolation of cases, proper hydration, hygiene maintenance and sanitation.
KL/IDU/2025/47/2097	Kerala	Idukki	Suspected Food Poisoning	42	0	20-11-2025	23-11-2025	Under Control	Cases of nausea, vomiting, loose motion and abdominal pain were reported from Village Mannamkandam, Sub-District Devikulam, District Idukki. District RRT investigated the outbreak. The affected age group was 20-60 years. Cases had attended

									a wedding reception. All cases were treated. 3 water samples collected and sent for laboratory testing at Kerala Water Authority Lab Adimaly were potable. Community awareness and health education given by the peripheral team on safe food habits, hygiene and sanitation.
KL/KAN/2025/47/2098	Kerala	Kannur	Mpox	1	0	20-11-2025	22-11-2025	Under Surveillance	A 25-year-old male, working as a hotel waiter in Mussafah, Abu Dhabi, developed symptoms on 03/11/2025, including headache, fever and throat pain. He consulted a private clinic on 04/11/2025. He developed a few more small lesions. After another one week, he consulted a private clinic, where Mpox was suspected, and he was

									<p>advised to take rest and return to his home country. On 19/11/2025 at 4:00 PM, he arrived at Kannur Airport and proceeded directly to Fathima Clinic, Mayyil, for medical consultation. He was referred to Pariyaram MCH, where he was admitted in the isolation ward on 19/11/2025. Clinical samples including throat swab, serum, lesion fluid and urine were collected and sent to VDRL, Kozhikode on 20/11/2025. The laboratory results were reported as positive for Mpox on 21/11/2025. The patient was discharged on 10/12/2025. Contacts were advised to isolate for 21 days. Community awareness and health education given by the</p>

District RRT investigated the outbreak. Cases developed symptoms 4-5 hours after consuming food in a marriage function. Cases were treated at CHC Nalkheda.</p>

Commented [A1]:

									The affected age group was 5-70 years. Community awareness and health education given by the peripheral team on safe food habits, hygiene and sanitation.
MH/AMR/2025/47/2104	Maharashtra	Amravati	Acute Gastroenteritis	12	0	16-11-2025	18-11-2025	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Sindi Bujruk (ward no. 2), Sub-District Achalpur, District Amravati. District RRT investigated the outbreak. House to house survey was done. People consumed water from a borewell. It was observed that contaminated water from a drain precipitated into the borewell leading to the outbreak. Cases were treated at a health camp established in the locality. Alternate water supply was arranged. Superchlorination of borewell was done. Pipeline leakages were repaired. Community awareness and health

									education given by the peripheral team on safe drinking water, hygiene and sanitation.
MH/THA/2025/47/2105	Maharashtra	Thane	Measles	14	0	20-11-2025	21-11-2025	Under Surveillance	Cases of fever with rash and cough were reported from Village MM Valley, Sub-District/District Thane. District RRT investigated the outbreak. Active search for fever cases was done in the locality. All cases were treated. The affected age group was 4-40 years. 2 blood samples collected and sent to Hafkine Lab Mumbai, tested positive for Measles (IgM ELISA). Vitamin A solution was given to the cases. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MN/TAM/2025/47/2106	Manipur	Tamenglong	Fever	63	0	15-11-2025	17-11-2025	Under Control	Cases of fever were reported from Village J.Pabram, Sub-District Tamenglong West,

									District Tamenglong. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Tousem. Adults were affected. All 15 blood samples collected, tested negative for Dengue and Malaria (Rapid NS1 and RDT Malaria Ag). Source reduction activities were undertaken. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
OR/BOU/2025/47/2107	Odisha	Boudh	Acute Diarrhoeal Disease	17	0	19-11-2025	19-11-2025	Under Surveillance	Cases of loose watery stools and abdominal pain were reported from Village Uurla, Sub-District Kantamal, District Boudh. District RRT investigated the outbreak. Open defecation was practiced in the affected area. Symptomatic treatment was given to cases. ORS packets were given to

									cases. Both children and adults were affected. 1 rectal swab sample collected and sent to DPHL Boudh, showed no enteropathogenic organism on culture test. 10 water samples collected from the dug well and tube well were found to be H ₂ S positive and OT test <0.01. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
OR/JHA/2025/47/2108	Odisha	Jharsuguda	Suspected Food Poisoning	23	0	17-11-2025	17-11-2025	Under Surveillance	Cases of loose motion and vomiting were reported from Village Tangargada, Sub-District Laikera, District Jharsuguda. District RRT investigated the outbreak. It was inspected that a marriage ceremony took place in the village on 16.11.2025. The leftover food from the event (Rice, Dal, Khata, Chicken) was given to children the next

									<p>morning on 17.11.2025. Approximately 30 minutes after consumption, several children began experiencing nausea and vomiting. All cases were treated at a health camp established in the locality. Cases were in the age group 5-18 years. 2 water samples (from dug well and tube well) and 6 rectal swabs were sent to DPHL Jharsuguda. The rectal swab samples showed no enteropathogenic organism on culture test. The water water samples were found to be H₂S positive and OT test <0.01. Community awareness and health education given by the peripheral team on safe food habits, hygiene and sanitation.</p>
OR/NAY/2025/47/2109	Odisha	Nayagarh	Hepatitis A	30	0	19-11-2025	21-11-2025	Under Surveillance	<p>Cases of fever with loss of appetite, loose motion, abdominal pain and dark coloured urine were reported from Village</p>

									<p>Ghasadeipur, Sub-District Odagaon, District Nayagarh. District RRT investigated the outbreak. Cases were students of Government Polytechnic residing in a hostel. Probable cause of the outbreak was consumption of water from a bore well situated near to a septic tank in the hostel premises. A medical camp was established in the hostel premises. All cases were treated. The affected age group was 15-50 years. Out of 30 blood samples collected and sent to DPHL Jharsuguda, 17 samples tested positive for Hepatitis A (IgM ELISA). 2 water samples (from dug well and tube well) were found to be H₂S positive and OT<0.01. Chlorination of bore well & overhead tanks was done. Hostel authority was advised to close the bore well for</p>
