Title:	2 dead, 6 critical after drinking contaminated water in Hyderabad, Telangana			
Action By CSU, IDSP -NCDC	Information communicated to DSU – Hyderabad, SSU- Telangana			

In the past two days, drinking contaminated water in the city Mailardevpally resulted in at least two deaths, one of whom was a woman, and six other hospitalizations for serious diseases. A six-month-old baby who was hospitalised is stated to be in a severe condition.

The 22-year-old woman Afreen Sultana passed away on Wednesday while receiving medical care in a hospital. She joined the list of victims in the tragedy after a child, Mohammed Khaiser, died on Tuesday.

The locals alleged that the government's incompetence led to their deaths by failing to investigate frequent water poisoning. The patients being treated in a hospital include Azharuddin, Shamreen Begum, R P Singh, Shahzadi Begum, Ittheshamuddin, and Faiza Begum.

The victims are from Mailardevpally's Mughal Colony, where locals have long complained about the area's supply of tainted, hazardous water.
